See Remarks

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

APO, 4300 Chestnut Street
St. Louis 20, Missouri

1. This office is conducting an investigation to determine the identity of a deceased member of the Armed Forces, whose death occurred approximately 19 November 1944 in the vicinity of Henri Chapelle Cemetery, (Liège, Belgium, or Aachen, Germany). The name "WERTMAN" appears on CD documents and "ROBERT WERTMAN" is noted on loggings.

2. Organizations known to have been in the vicinity of Liège, Belgium and Aachen, Germany, during that time were the 1st Infantry Division, the 10th Infantry Division and the 3rd Armored Division.

3. It is requested that personnel of the 1st and 10th Infantry Divisions and the 3rd Armored Division be searched and this office furnished a list of personnel reported killed or missing in action approximately 19 November 1944 in the vicinity of Liège, Belgium or Aachen, Germany, together with whatever information may be available that will be of assistance to this office in establishing the identity of Unknown Deceased.

See Remarks

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
