CERTIFICATE OF UNIDENTIFIABILITY OF REMAINS

1. The records pertaining to Unknown X - 6349, Plot BB  
Row 5, Grave 116, USMC NEUVILLE, Belgium,  
have been reviewed and it is the opinion of this Office that sufficient  
evidence is not available at the present time to establish the identity  
of the deceased concerned. The remains concerned should be classified as  
unidentifiable at the present time.

2. Report of Reprocessing of remains was forwarded to your  
Office by Transmittal Letter No. 2506, dated 13-10-47.

3. Remarks: The tooth chart of X-6349 has been compared with  
available dental records for all unresolved casualties in the map sheet with  
negative results. Efforts to associate subject remains with unresolved  
casualty or casualties by all other means have proven negative.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations. See remarks

**MISSING TEETH** - All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be 'X'ed out and labeled, thus:

**CROWNED TEETH** - Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus:

**BRIDGE WORK** - Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus:

**FILLINGS** - Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus:

**CARIES (CAVITIES)** - Outline location and size of cavity, shade in thus:

**DENTURES (PLATES)** - Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp."

**ADDITIONAL SPACE FOR FURTHER REMARKS**

Ⓟ = Posthumously missing.

Calculus heavy.  
 Heavy erosion of alveolar process of maxilla and mandible.  
 Occlusal surfaces moderately abraded.  
 Indications of bosses R 14, 16 and L 14.  
 Shallow socket present in the position of R 14 but the tooth probably was missing before death.  
 The crown of R 14 is completely decayed away.  
 From the appearance of these teeth this man may not have been a member of the American Army although there is a possibility he had been a P.W. during time and had not received dental care.

We were quite positive that the British 56th Graves Concentration Unit had three American deceased and possibly two more, which are listed as unknown Americans on the cemetery records. The former mentioned three (3) deceased are as follows:

Rohrborn, Fritz P.o.W. No. 313601 IVB Grave No. 580  
Listed in AGRC Unresolved Casualties as Rohrborn, Fritz J., Pvt.  
DOC, 422 Inf., Jan. 7, 1945

Nickel, Charles, P.o.W. No. 338538 IVB Grave No. 582  
Listed in AGRC Unresolved Casualties as Nickel, Charles E., Pfc.,  
DOC, 393 Inf., Jan. 14, 1945

Newman, Louis, P.o.W. No. 318393 IVB Grave No. 586  
Listed in AGRC Unresolved Casualties as Newman, Louis A., Pvt.,  
DOC, 44 Eng. C., Jan. 16, 1945.

Graves No. 618 and 620 were also listed as unknown Americans on the cemetery records but have been previously evacuated with the above mentioned bodies.

After the team returned from the field to Berlin we payed a visit to the British 56th Graves Concentration Unit and explained the case of the five bodies which we believed them to have disinterred. They in turn opened their complete Neuburxdorf files for us. These files stated that they had disinterred forty-seven (47) British remains from this cemetery and that all the remains had also been identified. There was nothing in their records to show that they had had anything to do with the graves in question.

After leaving the British 56th Graves Concentration Unit we went to the French Bureau of Displaced Persons, Berlin-Halensee, to find out they had disinterred these remains by mistake. Here we found that the French have had no teams in Neuburxdorf as yet.

Another investigation will be made on this case in an endeavor to find out what became of these remains in question.

## NARRATIVE OF DISINTERMENT

NEUBURXDORF, GERMANY (N 52/B 83; 1/250, 000)

7 - 8 th August. Disinterred in the community cemetery (Prisoner-of-War Section) of Neuburxdorf, Sachsen Province. The remains of twenty-eight deceased were disinterred.

The graves were located as shown on the attached sketch. We could not take the graves in order in the disinterring as it would have caused too many cave-ins. It was found that the basic documents listing the deceased by name, Stalag serial number, date of death, and grave number proved to be one hundred percent accurate. Of the total exhumations from the cemetery, sixteen were identified by dog-tags, every name agreeing with the cemetery records as to the number of the grave. Graves number 580, 582, 586, 620, 618 had no bodies in them. The boxes were still there but the German laborers stated that the British Team which had been there before us had disinterred the bodies in those graves. We made sure there were no remains in these graves or in the boxes which were in the graves by a very thorough examination of them all. The tops of the coffins had been smashed in and each of the five showed evidence of having contained bodies. In one, some hair still remained. We raised the coffins and dug under them without finding any trace of the bodies.

Although we had nothing in our records on graves 583 and 590, the cemetery records showed that Americans were buried in both graves. According to the cemetery records, grave 583 had an unknown American and grave 590 an American named Frank Gregory (Note: AGRC Cas. Lists contain no person by that name).

All of the remains were in fair condition with the exception of that in grave 622 (Victor Fatty) which was not buried in a box, and grave 593 (Lawrence Denson) which was under water.

The following remains were disinterred 7 August 1947:

<u>Body</u>	<u>Grave No.</u>	<u>Box No.</u>	<u>Name</u>

2	578	A-36	Ident.Tag Franklin L. Perry
