SUBJECT: Isolated Burials.

TO : Commanding Officer, 1st QM Group, APO 562, U.S. Army.

l. Following is extract from letter of C. Insley, Les Soeurs Garde Malades de Ste Marie, St Malo, Rue E Renan:

"A few months ago when the American troops advanced towards St Malo there was hard fighting in the vicinity of that town and a few of your men fell in a field close to my brother's country estate named "La Grande Riviere" at Parame near St Malo. One of these men was subsequently die, covered and buried on my brother's estate and only a few days ago I visited his grave and found it well kept and covered with flowers. His rifle and helmet with a small wooden cross were placed on the grave and the name MILT MABELL is written on the front and inside the helmet. After further investigations it came to my knowledge that a close-by farmer while making search discovered some distance from the body a small pocket leather folder in which were found several photos apparently of the deceased man's family, parents, wife and children, also 48 francs in French notes. This folder and its contents are now in my possession and I would be glad to hear from you in case you wish to investigate this particular case with the view to ascertaining the identity of this man and his relatives in the USA."

2. Request investigation, disinterment and reburial be made in accordance with technical directive "Search of Battlefields for Tsolated Burials and Unburied Remains", and GR Form #1 be attached to this correspondence and returned to this headquarters. Further request effects be secured from C. Insley, as these may be the means to identify the deceased. The surrounding area should also be searched as the information given states "a few men fell in a field". This is interpreted to mean wounded but others than the one referred to, may be buried in the vicinity.

3. Check Lists for Disinterments are to be attached to each

copy of Burial, Report.

Incl: Check Lists.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
