The remains now designated Unknown X\_1102 (USMC Saint Avoid) were recovered from the visinity of Reppenheim, Sermany. These remains were originally thought to be those of Pfc Vinson F. SOMER, 13016919 but the fingerprints on Report of Burial do not correspond with those of Pfc Somer. Fingerprints were also compared against ensualties known to have been interred in semetery from which these remains were recovered also without results. Several attempts have been made to identify this Unknown through the use of fingerprints without results. Tooth chart and physical characteristics of X\_1102 have been compared against unresolved casualties in the area from which these remains were recovered also without results. In view of this these remains are being declared UNIDENTIFIARLE.

This dental chart is very important and should be filled in with great care. There are
32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the
middle line in both upper and lower jaws, the teeth are arranged symmetrically on either
side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids
(chewing teeth), and molars (principal chewing teeth). An examination should be made and
findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge
work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.
See reverse side for illustrations.
