This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

LITTLE FINGER LEFT	INSTRUCTIONS: (a) Great care will be taken to record the most minute clues for the future identity of unidentified remains. Fill in anatomical characteristics below, and any other clues under "Other," such as shoe size, social security number; position of body found in airplanes, vehicles, and tanks; and serial numbers of airplanes, vehicles, and tanks. (b) A fingerprint, or prints, are the most valuable of all clues. Imprint all fingers and thumbs in the chart at left, or as many as possible. If no fingerprint or prints can be secured, the condition of each and every tooth will be indicated on the tooth chart in accordance with diagram below. Tooth chart will not be accomplished if one or more fingerprints are secured.

THUMB LEFT	OTHER IDENTIFICATION CLUES Case 1F-1146 came to Central Identification Point as a single case but upon processing, parts of two (2) bodies were found and segregation was made into cases 1F-1146 A and 1F-1146 B. Case 1 F - 1146 B is derived from the fact that an extra head was found with the remains in case 1F-1146. Efforts were made to tie this head to one of the other cases, 1F-1123 to and including 1F-1150, but without success. Processing at Central Identification Point failed to reveal any identifying clues therefore this case is made "UNKNOWN".
