See Remarks

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth) An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

Harold S. Wheeler

Signature of Officer or other person who prepared Tooth chart

Verified by G. R. C. Officer

MISSING TEETH All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be "X" 'd out and labeled, thus

CROWNED TEETH Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus

BRIDGE WORK Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus

FILLINGS Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus

CARIES (CAVITIES) Outline location and size of cavity, shade in thus.

DENTURES (PLATES)... Draw diagram of relative size and shape of plate block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp"

ADDITIONAL SPACE FOR FURTHER REMARKS

Size small
Color ivory (brown stain)
Posthumously missing R 3, 2, 1, 12; L 1, 2, 3, 4, 5
Spaces R 8-4, 12 mm
R 8 inclined mesially
R 3 (alveolus) rotated distally 60°
