2nd Ind.

HEADQUARTERS ANTILLES DEPARTMENT, APO 851, c/o Postmaster, Miami, Florida

TO: The Quartermaster General, Washington 25, D. C.

The following report of findings has been submitted by Captain J. G. Foulkes, Jr., Commanding Officer, 1906 TBU QMC AGES Team:

a. The remains of Captain Sliter and the leg interred as Ensign Sliter have been reinterred together as Ensign Sliter.

b. The remains of Ralph Wallace Grace were compared with Unknown K-1, and it was found that both remains contained femur bones along with several other duplications. It was determined from information contained in the burial bottle interred with Unknown K-1 that a pair of flight boots had been located with these remains. The contents of Grace's casket contained a pair of service shoes.

COPY

c. When the remains of Alfred Lester Clapp, Jr., were compared with Unknown X-1, it was found that the bones which made up these remains compared favorably with the unknown. The attached case reports indicate the comparison. The remains of Unknown X-1 were found to be intact with the exception of the right and left Tibia, the left Fibula and the left calcaneus which were missing. The remains of Alfred Lester Clapp contained only the bones listed as missing in Unknown X-1 above. It is therefore assumed that these two burial are one in the same person, and have been reinterred under Lt. (JG) Alfred Lester Clapp.

d. Seventeen (17) remains listed in paragraph 3 were disinterred and compared with the bones which made up Unknown X-2 and X-3. The only favorable comparison reached was with the remains of San James Vacanti. Vacanti's remains appeared to be complete with the exception of the radius and ulna and bones of the hands. The bones of this remains were unbroken except below the pelvis region. It cannot be proven that Unknown X-3 is part of the remains of Vacanti, and it is therefore recommended that these bones remain as Unknown X-3. Unknown X-2 did not compare favorably with any of the 17 remains shown in basic communication.

3. It is not considered advisable that the remains of Unknown X-2 and Unknown X-3 be recorded as a group burial of five (5) as stated in paragraph 4, preceding ~~Int~~ Interment, since the remains are definitely not complete enough for even one remains.

IN REPLY

REPLY TO: 293 (Isolated Burials)

6 June 1947

SUBJECT: Isolated Burials - Brazil

TO: The Quartermaster General  
Washington 25, D. C.  
ATTENTION: Chief, Memorial Division

1. Reference is made to paragraph 3, letter this headquarters, dated 8 May 1947, Subject: Completion of Concentration Activities - Brazil, file 687 Brazil (copy attached).

2. Attached hereto are four (4) burial reports covering the isolated burials recovered from Ilha Grande area, Maranhao. These remains were all victims of a PBY that crashed 27 November 1944 in the State of Maranhao, Brazil. A Naval Search and Recovery Team recovered seventeen, (17) remains from this area, which were taken to Sao Luis, Brazil, identified and buried 11 December 1944, in the Joint Army-Navy Cemetery, Tirirical Field, Sao Luis, Brazil.

3. Evidence found upon disinterment of Unknown X-2 and X-3, and information obtained by natives, indicates that these remains had previously been disinterred and portions (as indicated in Section 3, Form 1042) were inadvertently left in the grave.

4. The remains buried and marked as Capt. Robert Sliter are believed to be other portions of the remains interred at Sao Luis as Ensign Robert Sliter, 347224, USN. Attention is invited to Section 3 of form 1042 inclosed. It will be noted that natives reported only a leg was taken from Maranhao to Sao Luis for reburial. Disinterment team at Sao Luis found only a leg in Ensign Sliter's grave. A tooth chart was obtained from the portion of remains found at Maranhao and is inclosed with burial report. From all indications, the remains in two cases shipped to San Juan, Puerto Rico are those of one and the same person.

5. From the condition of remains found in the grave of X-1, it was impossible to determine if parts had been removed to Sao Luis with the others, but it is probable that they were. A tooth chart was obtained and is inclosed with burial report.

COPY

Ltr to OCMG, Wash, D. C., file 293 (Isolated Burials), Subject:  
Isolated Burials - Brazil, dated 6 June 1947 (cont'd)

6. A fourth unknown in this area, victim of the same crash, was reported buried on Macurandiba Island in this area. A thorough search of the area was made without success. Mr. Benjamin Rodrigues, who reported the burial, assisted in the search and is confident that remains are there. He will continue the search and report findings to this headquarters.

7. Attached hereto is Information Copy of Memorandum on file at the American Consul at Sao Luis and Belem, Brazil, regarding visit of Mr. Rodrigues on 7 March 1947, which states the only parts of remains referred to in paragraphs 3 and 4 were recovered.

OMGMN 314.6 - BRAZIL

1st Ind

WD, OCMO, Washington 25, D. C.

6 August 1947

TO: Commanding General, Antilles Department, APO 851, c/o Postmaster, Miami, Florida.

1. The remains minus a leg, believed to be those of Captain Robert SLITER, recovered from Ilha Grande Area, Maranhao, Brazil, have been identified, from comparison of dental records, by the Dental Professional Division, Bureau of Medicine and Surgery, Navy Department, as those of Ensign Robert SLITER, 34722h, USNR. Death occurred on 27 November 1944. Next of kin is the wife, Shirlee Sliter, 1000 Carolyn Avenue, San Jose, California. His expressed religious preference is Protestant. It is requested that the leg recovered from Ensign Sliter's grave at Sao Luis (Grave 32) be interred with the above remains.

2. The dental chart for the remains, Unknown X-1, is similar to the dental records of Lt. (jg) Alfred Lester GLAPP, Jr., 278648, USNR and Lt. (jg) Ralph Wallace GRACE, 329556, USN, who were interred in Graves 20 and 8 respectively at Sao Luis. Positive identification cannot be established. It is requested that the remains of Lt. (jg) Alfred Lester GLAPP, Jr., and Lt. (jg) Ralph Wallace GRACE be examined to determine if the bones found with Unknown X-1 could be part of one of these remains. If so, it is further requested that the remains, Unknown X-1, be reinterred with those from which they are missing.

3. The partial remains of Unknown X-2 and X-3 cannot be individually identified. It is requested that the graves of the following personnel be disinterred to determine if these can be matched with missing parts:

BAILLY, James Scobie, Jr., 761 64 46, AMN3e, USNR  
BRYAN, Raymond Charles, 296 17 91, AMN3e, USN  
GLAPP, Alfred Lester, Jr., 278648, Lt. (jg), USNR  
COOK, Thomas David, Jr., 359 99 50, ACN1, USN  
COTE, Raymond Anis, 300 99 72, Pr2e, USN  
GILE, Winston Liseomb, 201 53 14, AN1c, USN  
GRACE, Ralph Wallace, 329556, Lt. (jg), USN  
HENSCHON, William Francis, 607 69 30, AMN3e, USNR  
KEEGAN, John Francis, 403 75 34, AN1c, USN  
LEWIS, John Kenneth, 400 90 19, AMN2e, USNR  
MEYER, Virgil Lewis, 329 25 67, AMN2e, USN  
REYNOLDS, Harold Daniel, 252670, Lt. (jg), USNR  
ROGERS, Vincel George, 644 08 70, AN1c, USNR  
SEPTOR, Kenneth William, 258 29 98, AN1c, USN  
SLITER, Robert (NMI), 34722h, Ensign, USNR  
VACANTI, Sam James, 316 41 34, ACN1, USN  
WILLIAMS, William Jackson, Jr., 352161, Ensign, USN

4. If Unknown X-2 and X-3 cannot be identified as missing parts of the above remains, it is requested that they be recorded as a group burial consisting of the following:

**INSTRUCTIONS:**

(a) Great care will be taken to record the most minute clues for the future identity of unidentified remains. Fill in anatomical characteristics below, and any other clues under "Other," such as shoe size, social security number; position of body found in airplanes, vehicles, and tanks; and serial numbers of airplanes, vehicles, and tanks.

(b) A fingerprint, or prints, are the most valuable of all clues. Imprint all fingers and thumbs in the chart at left, or as many as possible. If no fingerprint or prints can be secured, the condition of each and every tooth will be indicated on the tooth chart in accordance with diagram below. Tooth chart will not be accomplished if one or more fingerprints are secured.
