Date

Last Name	First	Initial	Grade	Serial No.
Unit			Organization	

Place of Death      Date of Death      Cause of Death

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

Size - Large  
Color - Ivory  
spaces - R4-5 11mm  
          - L6 NONE  
          - L11-12 8mm  
          - (upper anteriors spaced loosely)

SUBJECT: Record of CIL Remains

TO: The Quartermaster General  
Washington 25, D. C.

1. Forwarded herewith are Identification Laboratory Reports, dated 25 February 1955, pertaining to the recovery of remains designated SR 584 A, B and C.

2. Upon processing it was found that SR 584-A are additional portions of P/O Arthur H Richards, T-122885, whose remains are now permanently interred in the United States Military Cemetery, Hamm, Luxembourg. Portions SR 584-B are considered favorable for T/Sgt James E WOODGATE, 36102445, only unresolved casualty of aircraft 42-95717, based on process of elimination. However, insufficient portions exist on which identification can be based. Portions SR 584-C are considered portions of S/Sgt John T POSHEPCO, 33112429, whose remains are now permanently interred in the United States Military Cemetery, Hamm, Luxembourg.

3. In view of the above partial remains SR 584 A, B and C were designated CIL number 5068 A, B and C respectively. Attached hereto are Records of CIL Forms.

REMAINS PROCESSED : SR # 584 A, B and C.

IDENTIFICATION LABORATORY REPORT

1. Search and Recovery Case # 584 pertains to partial remains recently recovered from the cemetery at Hartmannsdorf (M-51/J-96) Germany. German records indicate subject grave site contained four (4) casualty crew members of A/C E-17 G # 42-95717 which crashed 24 August 1944 near Hartmannsdorf. To date three (3) of the above four (4) crewmembers have been recovered from the cemetery at Hartmannsdorf as follows:

Unknown X-81	Grand Faily as	RICHARDS, Arthur H.	T-122 885	F/C
Unknown X-99	Grand Faily as	POSHEFKO, John T.	33 112 429	S/Sgt
Unknown X-179	St. Avold as	DRUMMOND, Julius H.	0-749 762	2/Lt

The remains of T/Sgt James H. WOODGATE, the fourth (4th) crewmember have never been recovered and/or identified.

2. The recent re-investigation of the grave site at Hartmannsdorf revealed the presence of an ID tag for "JAMES WOODGATE 36102445" and partial remains which have been segregated into cases SR 584 A, B and C representing portions of at least three (3) deceased. Associations between subject portions and the crew members are indicated below:

	<u>AGE</u>	<u>HEIGHT</u>	<u>WEIGHT</u>	<u>HAIR</u>	<u>SHOE</u>
SR 584 A	Aprx 25	U.T.D.	Heavy	None	---
F/O RICHARDS	---	71 3/4"	175	Black	10 D

Major portions of the skull are present with complete maxilla and mandible. The teeth compare excellently with dental records for F/O RICHARDS. Also present are hand and finger bones which are heavy and strong and conform to the heavy bone structure of skull portions for F/O RICHARDS. An examination of the skeletal chart available for F/O RICHARDS (X-81 Grand Faily) indicates the complete skull, all hand bones and several foot bones are missing.

(Identification Laboratory Report, dated 25 February 1955, cont'd)

SR 584 B	23-28	U.T.D.	Med. Lt.	None	9 - 9 1/2
2/Lt DRUMMOND	22-23	70"	170	Brown	---
T/Sgt WOODGATE	26-27	68"	---	Brown	9 1/2 D

Major portions of the skull are present but there are no teeth. This skull is of lighter construction than in cases "A" and "C". Also present are the fourth (4th) right metacarpal and adjacent phalange, a right talus and second metatarsal left foot. These hand and foot portions are also smaller than in cases "A" and "C". The foot bones are comparable to size 9 or 9 1/2 which is in agreement with the size 9 1/2 D indicated for T/Sgt WOODGATE.

The foot bones appear to be best associated with T/Sgt WOODGATE because of the agreement in size and the fact that foot bones are shown as present on the skeletal chart for 2/Lt DRUMMOND and the talus is shown as present on the skeletal chart for F/O RICHARDS. In addition, foot bones estimated as size 10 1/2 to 11 are present in case "C" which can only be associated with S/Sgt POSHEFKO (see details below).

SR 584 C	Over 20	U.T.D.	Med. Hvy	None	10 1/2 - 11
S/Sgt POSHEFKO	25	---	---	---	---

Two skull portions, several hand bones, distal half right tibia with articulating talus and calcaneus and the five metatarsal bones of the right foot are present with this case.

These portions are consolidated as case "C" because of the similarity in size, weight and coloration. There is no skeletal chart available for the remains identified as S/Sgt POSHEFKO but this case is best associated with him by the process of elimination. The portions are negative for an association with T/Sgt WOODGATE and are shown as present in the charts for F/O RICHARDS and 2/Lt DRUMMOND.

3. The finding of an ID tag for T/Sgt WOODGATE as well as skeletal portions which are favorable for subject deceased indicates he was buried with the three (3) associated crew members as noted in German Records. It would seem then that the remains of T/Sgt WOODGATE were removed from Hartmannsdorf at the same time the three (3) identified crew members were disinterred and is now buried as an Unknown.
