U.S. soldiers buried

NEUVILLE-EN-CONDROZ, Belgium (AP) — Three unknown American soldiers who died 31 years ago on the Belgian-German border were buried today with full military honors at the U.S. military cemetery here.

Officials said the three were killed during the Allied drive against Germany in the winter of 1944-1945. Their bodies were found earlier this month in the Hurtgenwald Forest near Simmerath, just across the Belgian border and about 35 miles east of Liege.

The bodies were discovered by a West German bomb disposal team clearing the woods of mines and live ammunition that still remain from the heavy fighting that took place in the area.

"We only know for sure they were American because of the clothing and equipment we found. We could not identify them beyond that," said Francis Duffy, superintendent of the U.S. military cemetery where thousands of American soldiers are buried nine miles southwest of Liege.

The three were thought to be members of the 78th Division, which was leading a push through the area, but Duffy said even that was not sure.

Funeral rites were conducted by a Roman Catholic priest, a rabbi and a Protestant minister, a customary procedure when the religion of the dead is unknown.

An eight-man military police detail fired a salute as the coffins, covered by the stars and stripes, were lowered into the graves and a bugler played taps.

DEPARTMENT OF THE ARMY
PERSONAL AFFAIRS DIRECTORATE, TAGCEN
MEMORIAL AFFAIRS DIVISION
WASHINGTON, D. C. 20314

A Board of Officers appointed by DAAG-AMO-O Letter Orders, TC 453, dated 28 January and 13 February 1976 (Tab A) convened 17 May 1976, and after consideration of the factors presented, approved the Unidentifiability of Unknowns X-9423, X-9424, and X-9425, S&R 1093, U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany.

1. According to case papers (Tab B), the U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany, received a letter in May 1975 from the Mayor of the city of Simmerath, Germany stating that a shallow grave had been discovered by a German company clearing a certain section of wooded area along the German-Belgium border. The grave is located in a thickly wooded area approximately 9 kilometers northeast of Simmerath, near the very small village of Steckenborn (Tab C - Maps).

2. In June 1975, a search and recovery team was dispatched to the city of Simmerath. The office of the mayor provided a police escort to the grave site which had previously been disinterred by local police. Further examination of the grave site produced no other skeletal portions. No identification tags were found with the remains; however, the following items were recovered:

- One (1) pr brown boots, size 9E
- One (1) brown boot, size 8 1/2E
- Two (2) pr rubber boots, heavy duty, size unknown
- One (1) parachute
- Remnants of wool material

During a conversation with the police, the search team was advised that an American World War II, 4 engine bomber had crashed approximately 4 kilometers from where these remains were found. When the aircraft was removed in 1960, no remains were found. There is no record of the serial number, type of aircraft or date of crash. It was concluded that the only relationship between the three remains and the aircraft that crashed is the parachute.

(Unknowns X-9423, X-9424, X-9425, USA Mem Aff Actv, Frankfurt, Ger)

3. The remains (assigned S&R 1093) and effects were released to US custody and transported to the Frankfurt Mortuary for identification processing. The skeletal parts were found to be commingled, fragmentary and still under progressive erosion caused by prolonged natural weather elements. It was determined, after laboratory examination, that the skeletal remains consisted of portions of three (3) individuals. For examination and identification purposes, the remains were designated:

Unknown X-9423
Unknown X-9424
Unknown X-9425

4. The remains were processed simultaneously and segregation was based on the comparison of race, age group, bone morphology, body structure, articulation and osteometric comparisons. Partial dental charts were accomplished for each remains (See processing papers for each Unknown - Tabbed). The physical characteristics are as follows:

	AGE	HEIGHT	BUILD	HAIR	RACE
X-9423	26-30	T - 67.0" F&T - 67.7"	Average	Brown	Caucasoid
X-9424	18-21	T - 67.3" F&T - 67.0"	Average	Brown	Caucasoid
X-9425	24-27	T - 68.3" F&T - 67.7"	Average	None found	Caucasoid

5. In an effort to associate Unknowns X-9423, X-9424 and X-9425 with unresolved U. S. casualties of World War II, extensive research of historical records was conducted. Combat Chronicle, an Outline History of US Army Divisions, indicates that elements of the 78th Infantry Division were committed to combat in the Simmerath area during December 1944. Further, review of previously resolved cases indicated that Simmerath is located in the vicinity of the Hurtgen Forest where heavy fighting had taken place. The files of approximately 300 unresolved casualties who were listed on Nonrecoverable Findings in this area were screened. Comparison of dental and physical data from these files with information furnished in case papers met with negative results. Available records were searched for other unresolved casualties not listed on Nonrecoverable Findings but no association could be made with referenced Unknowns.

(Unknowns X-9423, X-9424, X-9425, USA Mem Aff Actv, Frankfurt, Ger)

CONCLUSION:

Based on the recovery of US type footwear and equipment, it is concluded that these remains are those of US casualties, possibly sustained during the battle of Hurtgen Forest; however, the unfavorable dental and/or physical comparisons precludes an association at this time with the casualties listed on Nonrecoverable Findings. Further, the fact that the remains were found lying side by side, and the absence of military insignia and clothing may indicate that the three individuals could have been taken prisoner elsewhere and their clothing removed.

RECOMMENDATION:

That remains designated Unknown X-9423, Unknown X-9424, and Unknown X-9425 (S&R 1093), U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany, be approved as UNIDENTIFIABLE.

REPORT OF RECOVERY AND EXAMINATION OF WORLD WAR II REMAINS

CASE UNKNOWN X-9423
UNKNOWN X-9424
UNKNOWN X-9425
S/R - 1093

CIRCUMSTANCES OF RECOVERY:

During the latter part of May 1975, this office received a letter from the Mayor of the City of Simmerath, Germany. The letter stated that a German company who has a contract with the Federal Republic of Germany, for the clearing of a certain section of wooded area long the German-Belgium border. This area is being cleared of all live ammunition, bombs and land mines.

During this clearing operation a very shallow grave (approximately 10-12 inches in depth) was discovered. The grave site is located in a thickly wooded area approximately 9 kilometers, northeast of Simmerath, near the very small village of Steckenborn. See attached German map.

On 2 June 1975 a search and recovery team was dispatched from the Frankfurt Mortuary to the city of Simmerath. The office of the mayor, provide the search team with a police escort to the gravesite. The grave-site had previously been disinterred by the local police. Further examination of the grave-site by the search team revealed no other skeletal portions or identification media.

The police explained to the search team that the remains were found lying side by side. It is very possible that the remains at time of death were placed upon the ground and during the next 30 years the accumulation of leaves and debris covered the remains. This could account for the very shallow grave.

During a conversation with the police, it was revealed that a American WW II type, 4 engine bomber, aircraft had crashed approximately 4 kilometers from where these remains were found. This could account for the parachute found with the remains at the grave-site. Parachute had not been deployed.

This aircraft was removed from the crash site in 1960. According to the mayor office no remains were found at the crash site, only live ammunition and bombs.

AEUMS-Cdr

11 Jul 75

REPORT OF RECOVERY AND EXAMINATION OF WORLD WAR II REMAINS

No official records were maintained at the city hall of Simmerath pertaining to this aircraft. Such information as date of aircrash, type of aircraft or serial number of aircraft is unknown.

During the war the city hall at Simmerath was destroyed by fire in January 1945. See attached translation of letter, dated 5 June 1975 concerning aircraft removal.

PROCESSING OF REMAINS:

The commingled skeletal parts were processed simultaneously. Fragmentary bones were pieced together and arranged in individual anatomical order. The recovered skeletal bones were still under progressive erosion caused by prolonged natural weathering (approx. 30 years).

All skeletal parts were processed simultaneously. Segregation of the remains is based upon the comparison race, age group, bone morphology, body structure, articulation and osteometric computations.

It was determined that these skeletal parts consists of portions of three (3) individual remains from S & R - 1093.

The remains were designated:

UNKNOWN X-9423
UNKNOWN X-9424
UNKNOWN X-9425

CONCLUSION:

The only relationship that exists between these 3 remains and the aircraft that crashed approximately 4 kilometers from the grave-site is the parachute. The parachute had not been deployed as the chute lines were still folded. Circumstances surrounding the presence of the parachute in the grave-site is unknown.

It is concluded that these three (3) skeletal remains are American casualties from World War II. This association is based upon the American type of footwear, brown boots (B.F. Goodrich), and heavy duty rubber boots, type issued to Americans in WW II. The absence of military type insignia and clothing can not be explained. It is possible that these 3 individual remains could have been taken POW, and their clothing and military insignia were removed before death.

RECOMMENDATIONS: None.

REF: Personal Conversation on 2.6.75 in the City Hall Kesternich

Dear Mr. Witzel,

In reference to above conversation I like to inform you, that the aircraft wreckage found in 1960 at the Rursee are those of a 4 engine American airplane. Mr. Antes, Fireworker from District Koeln, stated, that the crashed airplane had carried 14 bombs ea 500 Kg, which were recovered by him. We are sorry, that further details cannot be furnished.

As inclosure, you will receive 2 maps in scale 1 : 25000, indicating by check marks the recovery place of 2 remains and wreckage parts.

In addition is a claim from the Carpenter Siebertz, Kesternich, dated 24.5.1975 in the amount of DM 154,29 requesting refunding same to our local Community Pay-Office.

Other costs which were incurred by the Community Simmerath in connection with recovery of remains, will, without saying, not be claimed.

Sincerely,

signed: Jansen

Bezug: Persönliche Rücksprache im Rathaus Kesternich vom
2.6.1975

Sehr geehrter Mister Witzl!

Unter Bezugnahme auf die o. a. Unterredung teile ich mit, daß es sich bei dem im Jahre 1960 im Rursee gefundenen Flugzeugwracks um eine 4-motorige amerikanische Maschine handelt. Der Feuerwerker vom Kampfmittelräumdienst des Regierungsbezirks Köln, Herr Antes, gibt an, daß die abgestürzte Maschine 14 Bomben á 500 kg mit sich führte, die von ihm geborgen wurden. Weitere Angaben hierzu können leider nicht gemacht werden.

Als Anlage erhalten Sie zwei topographische Karten im Maßstab 1 : 25000, in denen der Fundort der zwei Leichen und Wrackteile markiert wurde.

Darüber hinaus lege ich Ihnen eine Rechnung des Tischlermeisters Siebertz, Kesternich, vom 24.5.1975 in Höhe von 154,29 DM mit der Bitte um Erstattung an die hiesige Gemeindekasse vor.

Sonstige Kosten, die der Gemeinde Simmerath durch die Bergung der Leichen und Flugzeugteile entstanden sind, werden selbstverständlich nicht geltend gemacht.

Hochachtungsvoll

(Jansen)

Planzeiger:

Der Planzeiger kann nur angewendet werden, wenn die Gitterlinien ausgezogen sind.
 Zum Ablesen ist die waagerechte Teilung so an eine waagerechte Gitterlinie zu legen, daß die senkrechte Teilung den zu bezeichnenden Kartenpunkt berührt. Dann ist an der waagerechten Teilung bei der nächsten linken senkrechten Gitterlinie der „Rechts“-Wert, und an der senkrechten Teilung der „Hoch“-Wert abzulesen.
 Der Rechtswert ist stets zuerst zu nennen. Die Punktangabe erfolgt in Metern. Nicht ablesbare Werte sind bis zur Angabe des vollen Meters durch Nullen zu ersetzen.
 Beispiel: Punkt p liegt in Metern:
 „Rechts“ 27 000 + 200 = 27 200 - (kurz:) 27 200
 „Hoch“ 57 96 000 + 450 = 57 96 450 - (kurz:) 96 450
 * Kennziffer des Meridianstreifens

 L 5304 Top. Karte 1:50 000 Zülpich
 5304 Top. Karte 1:25 000

Nadelabweichung:

Die Nadelabweichung gegen die Gitterlinie beträgt in der Blattmitte für 1970,0 - 4,9° westlich. Jährliche Abnahme 0,06°.

Als Nadelabweichung wird der Winkel zwischen der fehlerfreien, durch Eisen, elektrischen Starkstrom (Gleichstrom) usw. nicht beeinflussten Richtung der Magnetnadel und den allgemein nach Norden weisenden Gitterlinien dieses Kartenblattes bezeichnet. Für einen bestimmten Standpunkt erhält man die Größe dieses Winkels aus dem obenstehenden Wert der Nadelabweichung unter Umrechnung auf das laufende Kalenderjahr.
 Anwendung: Die Karte ist eingerichtet, wenn eine Bussole 1. mit ihrer Nord-Süd-Richtung an eine Gitterlinie (niemals Blatt-randseite) gelegt wird u. die Magnetnadel auf den Abweichungswert einspielt oder 2. mit ihrer Nord-Süd-Richtung an die Verbindungslinie zwischen dem in die Gradteilung am unteren Blatttrande übertragenen Nadelabweichungswert und der Marke „M“ am oberen Blatt-rande gelegt wird u. die Magnetnadel auf den Nullwert einspielt.

DAAG-PED

26 May 1976

SUBJECT: Permission to Inter World War II Remains in ABMC Cemetery

Secretary
American Battle Monuments Commission
Washington, D. C. 20314

1. Recently, the remains of three (3) World War II casualties were recovered near the village of Simmerath, Germany. No identification tags or other identifying media were found with the remains, however, the recovery of US type footwear and equipment led to the conclusion that these are the remains of US casualties. Efforts to associate the Unknown remains with unresolved casualties of World War II met with negative results and the remains were approved by a Board of Officers as Unidentifiable. A copy of the Board Proceedings is inclosed.

2. Request permission to inter the remains, designated Unknowns X-9423, X-9424, and X-9425, in an ABMC Cemetery in Europe. Upon receipt of your approval, the Commander, US Army Memorial Affairs Activity, Europe, Frankfurt, Germany, will be instructed to coordinate with the Superintendent of the Cemetery in completing burial arrangements.

DEPARTMENT OF THE 'ARMY'
PERSONAL AFFAIRS DIRECTORATE, TAGCEN
MEMORIAL AFFAIRS DIVISION
WASHINGTON, D. C. 20314

A Board of Officers appointed by DAAG-AMO-O Letter Orders, TC 453, dated 28 January and 13 February 1976 (Tab A) convened 17 May 7 1976, and after consideration of the factors presented, approved the Unidentifiability of Unknowns X-9423, X-9424, and X-9425, S&R 1093, U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany.

1. According to case papers (Tab B), the U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany, received a letter in May 1975 from the Mayor of the city of Simmerath, Germany stating that a shallow grave had been discovered by a German company clearing a certain section of wooded area along the German-Belgium border. The grave is located in a thickly wooded area approximately 9 kilometers northeast of Simmerath, near the very small village of Steckenborn (Tab C - Maps).

2. In June 1975, a search and recovery team was dispatched to the city of Simmerath. The office of the mayor provided a police escort to the grave site which had previously been disinterred by local police. Further examination of the grave site produced no other skeletal portions. No identification tags were found with the remains; however, the following items were recovered:

- One (1) pr brown boots, size 9E
- One (1) brown boot, size 8 1/2E
- Two (2) pr rubber boots, heavy duty, size unknown
- One (1) parachute
- Remnants of wool material

During a conversation with the police, the search team was advised that an American World War II, 4 engine bomber had crashed approximately 4 kilometers from where these remains were found. When the aircraft was removed in 1960, no remains were found. There is no record of the serial number, type of aircraft or date of crash. It was concluded that the only relationship between the three remains and the aircraft that crashed is the parachute.

(Unknowns X-9423, X-9424, X-9425, USA Mem Aff Actv, Frankfurt, Ger)

3. The remains (assigned S&R 1093) and effects were released to US custody and transported to the Frankfurt Mortuary for identification processing. The skeletal parts were found to be commingled, fragmentary and still under progressive erosion caused by prolonged natural weather elements. It was determined, after laboratory examination, that the skeletal remains consisted of portions of three (3) individuals. For examination and identification purposes, the remains were designated:

Unknown X-9423

Unknown X-9424

Unknown X-9425

4. The remains were processed simultaneously and segregation was based on the comparison of race, age group, bone morphology, body structure, articulation and osteometric comparisons. Partial dental charts were accomplished for each remains (See processing papers for each Unknown - Tabbed). The physical characteristics are as follows:

	AGE	HEIGHT	BUILD	HAIR	RACE
X-9423	26-30	T - 67.0" F&T - 67.7"	Average	Brown	Caucasoid
X-9424	18-21	T - 67.3" F&T - 67.0"	Average	Brown	Caucasoid
X-9425	24-27	T - 68.3" F&T - 67.7"	Average	None found	Caucasoid

5. In an effort to associate Unknowns X-9423, X-9424 and X-9425 with unresolved U. S. casualties of World War II, extensive research of historical records was conducted. Combat Chronicle, an Outline History of US Army Divisions, indicates that elements of the 78th Infantry Division were committed to combat in the Simmerath area during December 1944. Further, review of previously resolved cases indicated that Simmerath is located in the vicinity of the Hurtgen Forest where heavy fighting had taken place. The files of approximately 300 unresolved casualties who were listed on Nonrecoverable Findings in this area were screened. Comparison of dental and physical data from these files with information furnished in case papers met with negative results. Available records were searched for other unresolved casualties not listed on Nonrecoverable Findings but no association could be made with referenced Unknowns.

(Unknowns X-9423, X-9424, X-9425, USA Mem Aff Actv, Frankfurt, Ger)

CONCLUSION:

Based on the recovery of US type footwear and equipment, it is concluded that these remains are those of US casualties, possibly sustained during the battle of Hurtgen Forest; however, the unfavorable dental and/or physical comparisons precludes an association at this time with the casualties listed on Nonrecoverable Findings. Further, the fact that the remains were found lying side by side, and the absence of military insignia and clothing may indicate that the three individuals could have been taken prisoner elsewhere and their clothing removed.

RECOMMENDATION:

That remains designated Unknown X-9423, Unknown X-9424, and Unknown X-9425 (S&R 1093), U. S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany, be approved as UNIDENTIFIABLE.

REPORT OF RECOVERY AND EXAMINATION OF WORLD WAR II REMAINS

CASE UNKNOWN X-9423
UNKNOWN X-9424
UNKNOWN X-9425
S/R - 1093

CIRCUMSTANCES OF RECOVERY:

During the latter part of May 1975, this office received a letter from the Mayor of the City of Simmerath, Germany. The letter stated that a German company who has a contract with the Federal Republic of Germany, for the clearing of a certain section of wooded area long the German-Belgium border. This area is being cleared of all live ammunition, bombs and land mines.

During this clearing operation a very shallow grave (approximately 10-12 inches in depth) was discovered. The grave site is located in a thickly wooded area approximately 9 kilometers, northeast of Simmerath, near the very small village of Steckenborn. See attached German map.

On 2 June 1975 a search and recovery team was dispatched from the Frankfurt Mortuary to the city of Simmerath. The office of the mayor, provide the search team with a police escort to the gravesite. The grave-site had previously been disinterred by the local police. Further examination of the grave-site by the search team revealed no other skeletal portions or identification media.

The police explained to the search team that the remains were found lying side by side. It is very possible that the remains at time of death were placed upon the ground and during the next 30 years the accumulation of leaves and debris covered the remains. This could account for the very shallow grave.

During a conversation with the police, it was revealed that a American WW II type, 4 engine bomber, aircraft had crashed approximately 4 kilometers from where these remains were found. This could account for the parachute found with the remains at the grave-site. Parachute had not been deployed.

This aircraft was removed from the crash site in 1960. According to the mayor office no remains were found at the crash site, only live ammunition and bombs.

AEUMS-Cdr

11 Jul 75

REPORT OF RECOVERY AND EXAMINATION OF WORLD WAR II REMAINS

No official records were maintained at the city hall of Simmerath pertaining to this aircraft. Such information as date of aircrash, type of aircraft or serial number of aircraft is unknown.

During the war the city hall at Simmerath was destroyed by fire in January 1945. See attached translation of letter, dated 5 June 1975 concerning aircraft removal.

PROCESSING OF REMAINS:

The commingled skeletal parts were processed simultaneously. Fragmentary bones were pieced together and arranged in individual anatomical order. The recovered skeletal bones were still under progressive erosion caused by prolonged natural weathering (approx. 30 years).

All skeletal parts were processed simultaneously. Segregation of the remains is based upon the comparison race, age group, bone morphology, body structure, articulation and osteometric computations.

It was determined that these skeletal parts consists of portions of three (3) individual remains from S & R - 1093.

The remains were designated:

UNKNOWN X-9423

UNKNOWN X-9424

UNKNOWN X-9425

CONCLUSION:

The only relationship that exists between these 3 remains and the aircraft that crashed approximately 4 kilometers from the grave-site is the parachute. The parachute had not been deployed as the chute lines were still folded. Circumstances surrounding the presence of the parachute in the grave-site is unknown.

It is concluded that these three (3) skeletal remains are American casualties from World War II. This association is based upon the American type of footwear, brown boots (B.F. Goodrich), and heavy duty rubber boots, type issued to Americans in WW II. The absence of military type insignia and clothing can not be explained. It is possible that these 3 individual remains could have been taken POW, and their clothing and military insignia were removed before death.

RECOMMENDATIONS: None.

SUBJECT: Finding of Human Remains at the Gemeindewald Simmerath

REF: Personal Conversation on 2.6.75 in the City Hall Kesternich

Dear Mr. Witzel,

In reference to above conversation I like to inform you, that the aircraft wreckages found in 1960 at the Rursee are those of a 4 engine American airplane. Mr. Antes, Fireworker from District Koeln, stated, that the crashed airplane had carried 14 bombs ea 500 Kg, which were recovered by him. We are sorry, that further details cannot be furnished.

As inclosure, you will receive 2 maps in scale 1 : 25000, indicating by check marks the recovery places of 2 remains and wreckage parts.

In addition is a claim from the Carpenter Siebertz, Kesternich, dated 24.5.1975 in the amount of DM 154,29 requesting refunding same to our local Community Pay-Office.

Other costs which were incurred by the Community Simmerath in connection with recovery of remains, will, without saying, not be claimed.

Sincerely,

signed: Jansen

2.6.1975

Sehr geehrter Mister Witzl!

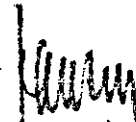

Unter Bezugnahme auf die o. a. Unterredung teile ich mit, daß es sich bei dem im Jahre 1960 im Rursee gefundenen Flugzeugwracks um eine 4-motorige amerikanische Maschine handelt. Der Feuerwerker vom Kampfmittelräumdienst des Regierungsbezirks Köln, Herr Antes, gibt an, daß die abgestürzte Maschine 14 Bomben á 500 kg mit sich führte, die von ihm geborgen wurden. Weitere Angaben hierzu können leider nicht gemacht werden.

Als Anlage erhalten Sie zwei topographische Karten im Maßstab 1 : 25000, in denen der Fundort der zwei Leichen und Wrackteile markiert wurde.

Darüber hinaus lege ich Ihnen eine Rechnung des Tischlermeisters Siebertz, Kesternich, vom 24.5.1975 in Höhe von 154,29 DM mit der Bitte um Erstattung an die hiesige Gemeindekasse vor.

Sonstige Kosten, die der Gemeinde Simmerath durch die Bergung der Leichen und Flugzeugteile entstanden sind, werden selbstverständlich nicht geltend gemacht.

Hochachtungsvoll

THE AMERICAN BATTLE MONUMENTS COMMISSION

WASHINGTON, D.C. 20314

ABMC (26 May 1976) 1st Ind

SUBJECT: Permission to Inter World War II Remains in ABMC Cemetery

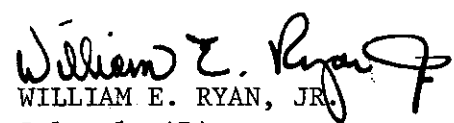

American Battle Monuments Commission, 4C014 Forrestal Building,
Washington, DC 20314 2 June 1976

TO: Office of the Adjutant General, DAAG-PED, Washington, DC 20314

1. Permission is granted to inter the remains of three World War II Unknowns designated as X-9423, X-9424, and X-9425 in the Ardennes American Cemetery and Memorial, Neuville-en-Condroz, Belgium.

2. Please have the Commander, U.S. Army Memorial Affairs Activity, Europe, Frankfurt, Germany coordinate burial arrangements with the Officer-in-Charge, ABMC European Office, Paris, France.

FOR THE SECRETARY:

WILLIAM E. RYAN, JR.
Colonel, ADA
Director of Operations
and Finance

DAAG-PED

26 May 1976

SUBJECT: Permission to Inter World War II Remains in ABMC Cemetery

Secretary
American Battle Monuments Commission
Washington, D. C. 20314

1. Recently, the remains of three (3) World War II casualties were recovered near the village of Simmerath, Germany. No identification tags or other identifying media were found with the remains, however, the recovery of US type footwear and equipment led to the conclusion that these are the remains of US casualties. Efforts to associate the Unknown remains with unresolved casualties of World War II met with negative results and the remains were approved by a Board of Officers as Unidentifiable. A copy of the Board Proceedings is inclosed.

2. Request permission to inter the remains, designated Unknowns X-9423, X-9424, and X-9425, in an ABMC Cemetery in Europe. Upon receipt of your approval, the Commander, US Army Memorial Affairs Activity, Europe, Frankfurt, Germany, will be instructed to coordinate with the Superintendent of the Cemetery in completing burial arrangements.
