CASE HISTORY

UNKNOWN X-9110

Griesheim/Main Mausoleum

The remains now designated Unknown X-9110 represent one of the two remains recovered from POW cemetery Stalag IX-C, near Untersuhl (L-51/H-68), Germany.

According to information furnished by investigating agent, the remains were found in the vicinity of a wrecked jeep near Untersuhl, 11 April 1945. Also, local inhabitants state that American POW's died during a forced march and were interred in the cemetery.

The records of this Stalag cemetery no longer exist.

A thorough review of the records of casualties lost in the area of recovery comprising Germany Map Sheets L-51, L-52, M-51 and M-52 failed to reveal a favorable comparison between an unrecovered casualty and subject remains.

In view of the lack of precise burial information and additional identifying media, it is believed that Unknown X-9110 should be declared Unidentifiable.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

Size - Average
 color - chalky stained ivory
 Posthumously
 missing - R 1, 2, 3, 4, 5, 9, 10, 11;
 - L 1, 2, 3, 9.

Note: L 8 unerupted
 Alignment - Very Good

INVESTIGATION DIRECTIVE : Deferred Search Agenda

SR # 337 & 338

PROCESSING DIRECTIVE : 155

16 April 1952

PROCESSING NARRATIVE

1. Search and Recovery Cases # 337 and # 338 pertain to remains recovered from POW Cemetery STALAG IX-C near UNTERSUHL (L-51/H-68), Germany. Inhabitants of this area state that several American POW's died in this area during a forced march and were buried in this cemetery. Of eighteen deceased examined sixteen (16) were rejected as being Non-American because of the extremely decayed condition of teeth, consistently short stature of 5'-0" to 5'-3" and the presence of at least three (3) female skeletons. The two (2) remains accepted as possible remains of U. S. casualties were accepted as such on the basis of well cared for teeth and the absence of any evidence to the contrary.

2. Tentative designations of these two (2) cases are:

SR # 337 now designated UNKNOWN X-9110 Griesheim/Main Mausoleum
Grave 111

SR # 338 now designated UNKNOWN X-9111 Griesheim/Main Mausoleum
Grave 112

3. At the time of processing there was no association with any known US casualties by location due to the POW status of these two deceased. Features of identification are submitted as follows:

	<u>AGE</u>	<u>HEIGHT</u>	<u>WEIGHT</u>	<u>HAIR</u>
X-9110 (Remains)	Aprx 26 Yrs	5' - 6 1/2"	130-150 Lbs	None found

Teeth are intact and/or articulate with the skull and first three (3) cervical vertebrae. Remains are not burned.

X-9111 (Remains)	Aprx 19 Yrs	5' -10 3/4"	170-190 Lbs	Blond
------------------	-------------	-------------	-------------	-------

Teeth are intact and/or articulate with the skull and first eleven (11) vertebrae. Remains are not burned.

4. CAUSE OF DEATH: Neither of these deceased show any skeletal evidence of injuries which might have caused death. It is believed that death was the result of malnutrition, disease or loss of blood from flesh wounds.

25 March 1952

REPORT OF DISINTERMENT

In the course of search for remains of 1/Lt RAYMOND E. ISCHES, O-700886 (M-52/4630) at POW Cemetery Stalag IX-C (RICHELSDORFERTHAL), agent conducting investigation was advised that a number of American deceased were interred in this cemetery during the latter part of the war.

According to the inhabitants of UNTERSUHL, remains of American POW's being forced marched toward the west succumbed to illness and malnutrition and were interred at this cemetery, also three (3) members of an aircraft which occurred near GERSTUNGEN were interred here, plus deceased members of two (2) tank crews.

Coffin in which SR # 337 was received was marked "US Jeep 11.4.45." According to information given agent, remains were found in vicinity of wrecked jeep near UNTERSUHL on date mentioned.

Unfortunately the records of this Stalag Cemetery no longer exist. The cemetery has had no care since the end of hostilities, and the crosses which marked the graves no longer exist.

Agent could only disinter where the inhabitants assumed interments were made. Of the eighteen (18) removed and processed by Mr. Wesley A. Neep during period 25 and 26 March 1952, only two (2) could be determined to be possibly Americans. The remaining sixteen (16) were rejected due to decay of teeth present, small stature - all sixteen (16) being between 5' and 5'3", several of which having female characteristics.
