CASE HISTORY

UNKNOWN No. X-9134

Griesheim/Main Mausoleum

The remains designated Unknown X-9134 Griesheim/Main Mausoleum were reportedly recovered from STEUDNITZ/Stadtroda, (M-51/J-85) Germany. There was no clothing recovered with this remains.

Information received from the agents making the recovery of this remains indicates that a grave-digger who had disinterred three (3) British airmen from this cemetery in 1950 also knew of the location of two (2) American graves. It seems that two earlier attempts to recover the two (2) US casualties from this cemetery met with negative results and the cemetery caretaker indicated that there were no US burials in that cemetery. With the assistance of the grave-digger who had disinterred the three (3) British airmen in 1950, a third attempt was made resulting in the recovery of remains now designated Unknown X-9120 (Prev. SR 348) and Unknown X-9134 (Prev. SR 349).

A thorough examination of the records of known casualties lost in the area surrounding place of recovery and covered by map sheets M-51, M-52, N-51 and N-52 has disclosed no favorable comparison between unrecovered casualties and Unknown X-9134.

In view of the lack of precise information as to date, place and cause of death of this deceased, it is recommended that Unknown X-9134 be declared unidentifiable.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

Size - Average

color - Dull stained Ivory

Posthumously
Missing - 17

Space - R14: 1mm

L4 & R4 Rotated Aprx. 20° distally.

L4,5; R4,5 have lingual version.

Note: Fillings in R8 and L6 are now semi-liquid Verfield by G. R.C. Officer similar to mercury.

R-13 Rotated 90° distally.

ET FORM 1-22 (29 AUG. 46)

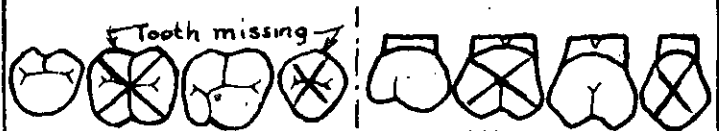

R-12 Rotated Aprx 25° mesially

(OLD GRAVE REGISTRATION FORM 1-A)

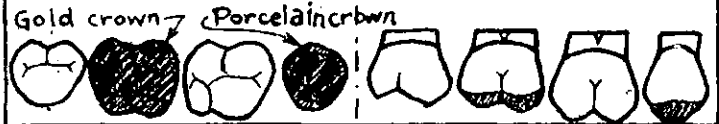

calculus - Fairly heavy

Signature of Officer or other person who prepared Tooth chart

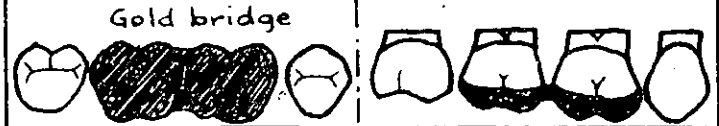

MISSING TEETH... All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be "X" 'd out and labeled, thus :

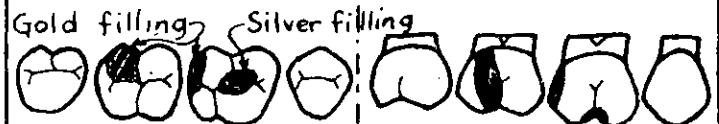

CROWNED TEETH... Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus :

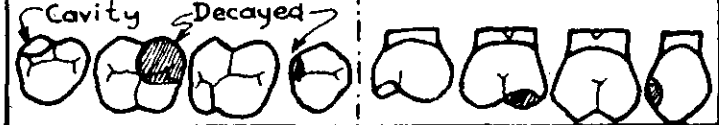

BRIDGE WORK... Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus :

FILLINGS... Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus :

CARIES (CAVITIES). Outline location and size of cavity, shade in thus :

DENTURES (PLATES)... Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp"

ADDITIONAL SPACE FOR FURTHER REMARKS

INVESTIGATION DIRECTIVE : Deferred Search SR # 349

PROCESSING DIRECTIVE : 176 1 August 1952

NARRATIVE OF PROCESSING

1. Search and Recovery Case # 349 pertains to one (1) deceased recovered from the Allied Nationals' section of the local cemetery at STEUDNITZ/STADTRODA, (M-51/J-85) Germany.

2. There was no clothing recovered with this remains but it was disinterred along with case SR # 348 which did have US Air Force clothing and equipment and both of these cases were recovered with the assistance of a JEMA grave-digger who claimed to know of the burial site of two (2) Americans. There was no contradictory evidence which might indicate this was the remains of other than an American.

3. An unknown "X" number has been assigned as follows:

SR # 349 is now designated UNKNOWN X-9134 Griesheim/Main Mausoleum
Grave 135

4. Laboratory examination disclosed the following physical characteristics:

	<u>AGE</u>	<u>HEIGHT</u>	<u>WEIGHT</u>	<u>HAIR</u>
X-9134 (Remains)	Approx 35 Yrs	5' - 8 3/8"	140-160 Lbs	Lt Brown

Teeth are intact in skull and mandible. There is excellent occlusion between mandible and maxilla and the mandible articulates with the skull. The skull articulates with the first cervical vertebra but further articulation is impossible as the next seven (7) vertebrae are missing. Agreement in age and structural features, however, indicates that all portions are for one and the same deceased.

5. CAUSE OF DEATH: There is no visible skeletal injury whereby cause of death can be determined. It is probable that death was the result of disease or loss of blood from flesh wounds.

TRANSLATION

Community Steudnitz
The Community Council

Steudnitz, 6 May 1952

Mr. P. Keilmann

CERTIFICATE

Upon instructions from Mr. Keilmann, two (2) further deceased were exhumed from the grave of Allied nationals in the local cemetery, which concern members of the US Army.

At the time the three (3) members of the British Army were disinterred, only these three (3) were evacuated to Berlin since they were known by name and the transport only was to include these three.

Since an exact location is no longer known, it was necessary to dig up the entire area concerned.

Since the Community Council in Steudnitz did not possess any records concerning those buried in the aforementioned grave, no exact report could be made.

The Community Council

/s/ Rohler

13 May 1952

REPORT OF EXHUMATION

SR's # 348 & # 349

1. Acting on information received from a JENA gravedigger, two (2) deceased were removed from the cemetery at STEUDNITZ/STADTRODA, (M-51/J-85) Germany and transferred to BERLIN, Germany.

2. The above mentioned grave-digger claims to have disinterred three (3) British airmen (only missing members of one crew) during 1950 from this particular cemetery and they were removed to the British War Cemetery in Berlin. He claimed that he knew of two (2) US burials at the STEUDNITZ cemetery.

3. Two visits to the cemetery of STEUDNITZ were met with negative statements that indicated there were no US dead buried there. A third visit accompanied by the JENA grave-digger is claimed to have forced an admission from the Burgomeister and grave-digger at STEUDNITZ that there were actually two (2) US dead buried there.

4. These two (2) cases were transferred to CIL Morgue in Frankfurt as cases SR # 348 and SR # 349 for complete processing.
