1. Proceedings of the Field Board of Review recommending that the remains of Unknown X-2323, AGRS Mausoleum, Manila, P.I., (formerly Unknown X-619, USAF Cemetery Leyte #1, P. I.) be identified as Pfc. Russel W. Davis, 16021488, are returned herewith because documentary evidence concerning the place of death and original burial of Pfc. Davis is not sufficient to warrant an identification.

2. In view of the above it is requested that further investigation be conducted by your headquarters and findings forwarded upon completion thereof.

SUBJECT: Unidentifiable Remains  
TO : The Quartermaster  
Washington 25, D. C.  
Attn: Memorial Division

The records pertaining to Unknown X- 619, Plot       ,  
Row       , Grave 8539, USMC USAF Cem. Leyte #1        have  
been reviewed and it is the opinion of this office that insufficient  
evidence is available to establish the identity of this deceased,  
and that these remains should be classified as unidentifiable.

13. REMARKS: (SEE REVERSE SIDE):

**REMARKS:**

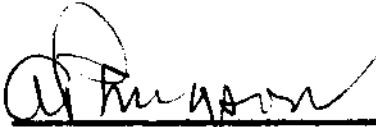

On the 11th of July 1947, a party of three went to see Father Haggerty as to the rumor that the remains of Gen. Fort were found on the grounds of Ateneo de Cagayan. He told us that the remains believed to be that of Gen. Fort were taken up by Givernor Cruz but there was a grave next to his that was believed to be an American.

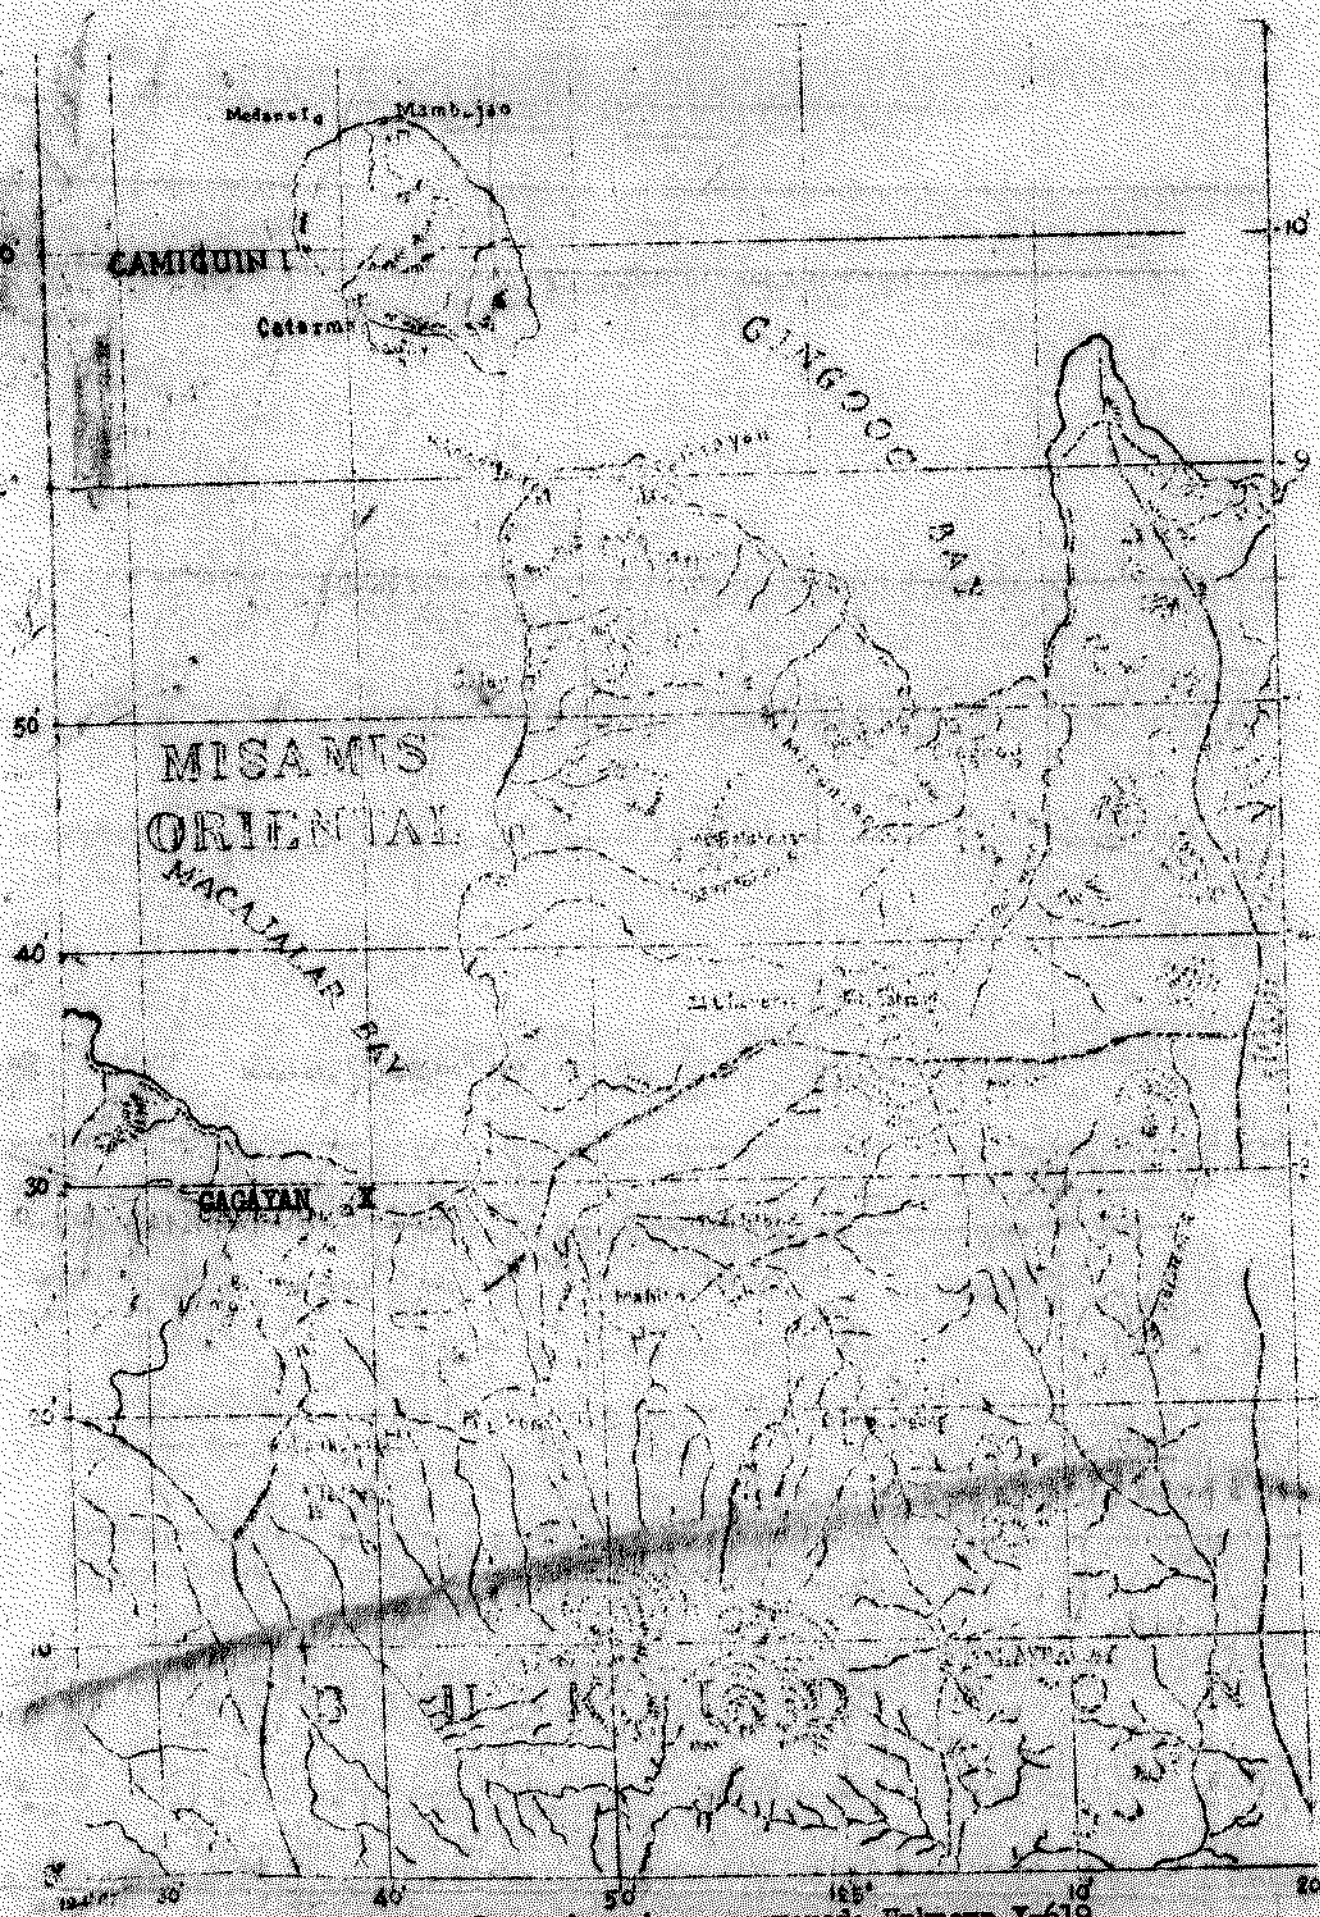

That afternoon we came back and dug up that grave and recovered the remains. The skeleton was complete with all the teeth. A belt buckle was also found with a spread eagle and the year 1940.

AFFIDAVIT

I, FELIPE MABALOS, 54 years old, married, resident of Cagayan, Or. Misamis, janitor of the Ateneo de Cagayan, Cagayan, Or. Misamis, after having been sworn to according to law, depose and say:

That after the surrender of the Philippines in 1942 I was left by Rev. J. E. Haggerty, S.J., Rector of the Ateneo de Cagayan to stay in the College and guard the properties of the College;

That in the later part of 1942 I noticed that there were two (2) trucks and two (2) cars loaded with Japanese soldiers with fixed bayonets entering the College campus. Later I saw some of the Japanese soldiers digging a hole. They were surrounded by another group. Scattered in different places from where the Japanese were digging were also Japanese soldiers with fixed bayonets. A few hours later these men left the place. When I found that they had left I came down from my hut which was but seventy (70) meters more or less from the spot where the men had dug a hole. I was curious in approaching the spot because I thought the Japanese had buried some money but to my dismay I saw that they had dug a grave. I found there were two (2) graves just near each other. One was newly dug - the other an old grave. When I noticed that the hole they dug was a grave I left the place.

That I suspected these two spots were the graves of high-ranking American officers because the Japanese usually kill and bury people they had killed in a place about one (1) kilometer away from my place; besides, only about two or three Japanese soldiers would witness the killing of an ordinary prisoner.

That the old grave was dug by some Americans who came to the Ateneo on July 11, 1947; the new grave was dug some months ago by order of the Provincial Governor of Oriental Misamis.

The above statement is true and correct to the best of my knowledge and belief. - July 14th., 1947.

INSTRUCTIONS FOR PROPER MARKINGS ON DENTAL CHART

1. Give all information and description on dental chart as nearly correct as the condition of the body will allow. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: lost teeth, crowned teeth, bridgework, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.

Missing Teeth

Crowned Teeth

Bridgework

Fillings

Caries (Cavities)

Dentures (Plates) Draw diagram of relative size and shape of plate block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp".

Remarks

Diagram represents the mouth wide open
