GENERAL IDENTIFICATION POINT
AERS APC 900
NICHOLS FIELD, MANILA, P.I.

17 May 1950

S T A T E M E N T

Reference: UNK X-4237 Male (formerly X-513, Manila #2)
" X-4238 " (" X-514 " ")
" X-4239 " (" X-515 " ")
" X-4232 " (" X-474 " ")
" X-4233 " (" X-475 " ")
" X-4234-A " (" X-476 " ")
" X-4234-B " (" X-476 " ")
" X-4235 " (" X-477 " ")
" X-4236 " (" X-478 " ")

The above nine (9) remains from Graves 825 and 829 Cabanatuan POW Cemetery were reprocessed by me this date for proper segregation, and new GPO Forms 1044 were accomplished for each.

Each of the remains is now properly segregated, and each represents ~~one~~ and the ~~same~~ individual. Improperly segregated bones, which could not be reassociated due to their eroded condition, were assigned GIL #589.

Examination of the three (3) remains from Grave #825 yielded the following associations:

UNK X-4237 Male, compares very favorably with LeCROY, Douglas E., as to height and absence of extractions. LeCROY's age is not known at this headquarters but the estimate age of the remains is 22 to 28 years.

UNK X-4238 Male, compares very favorably with SURBER, Donald H., as to short height (SURBER was the shortest decedent involved, and this remains is the shortest of the group), hair color, and absence of extractions and fillings. The third molars marked "X" on SURBER's dental chart were possibly unerupted at time that the dental chart was made. SURBER's age is not known at this headquarters, but the estimate age of the remains is 22 to 27 years.

UNK X-4239 Male, compares very favorably with COOPERHALL, Charles A., as to height, race, and absence of extractions and fillings (there was only one (1) small filling on B-14 on this remains). COOPERHALL's age is not known at this headquarters, but the estimate age of the remains is 20 to 25 years.

Serial #589, see page

Examination of the six (6) remains from Grave #829 yielded the following results:

UNK L-4232 Male, compares perfectly with DANIELS, Elmer as to great height, and pattern of extractions.

UNK L-4233 Male, compares very favorably with ACCIARDO, John J., as to height and dental work. The presence of a porcelain (Davis) crown on L-1 is a very diagnostic, and favorable comparison.

UNK L-4236 Male, compares very favorably with GOURLAY, Carlton R., as to height and pattern of extractions and fillings.

The other three (3) remains from Grave #829 do not compare favorably enough for individual comparison with the other associated decedents.

I recommend the individual identification of the following unknown remains:

UNK L-4237 Male as LeCHUY, Douglas W.
UNK L-4238 Male as BURDEN, Donald H.
UNK L-4239 Male as CONGERHALL, Charles A.
UNK L-4232 Male as DANIELS, Elmer
UNK L-4233 Male as ACCIARDO, John J.
UNK L-4236 Male as GOURLAY, Carlton R.

AGRS Mausoleum, Manila, P.I.
(Formerly X-474, 478, 513, 514, 515
475, 476, 477, USAF Cem, Manila #2)

29 February 1949

SUBJECT: Identification of Deceased Personnel

TO : Commanding General
Philippine Command
APO 707, c/o FM, San Francisco, Calif
ATTN AGRS PHILCOM ZONE

1. Reference is made to Board Proceedings, your Headquarters, recommending the following identification:

Unknown X-4232 as Daniels, Elmer, Pvt. 15 017 359
Unknown X-4236 as Accomando, John J., S/Sgt. 6 981 597
Unknown X-4237 as Finton, Norman W. Pfc. 6 572 716
Unknown X-4238 as Surber, Donald H., Pvt. 19 018 756
Unknown X-4239 as Coggeshall, Charles A., Spt., 19 016 755

and the Group Identification of Unknowns X-4233, X-4234-Z, X-4234-B, and X-4235 as the recoverable remains of:

Anderson, John A.	T/Sgt.	7 031 354
Gourlay, Carlton R.	Pvt.	32 074 027
Jordan, Major B.	Cpl.	6 923 343
LeCroy, Douglas W.	S/ Sgt.	6 971 422
Olson, Everell D.	S/Sgt.	6 913 132

These Board Proceedings are being returned herewith.

2. Since a discrepancy exists between the grave numbers shown for these individuals on the Cabanatuan Death Report and the actual grave from which several of the remains being recommended for identification were recovered, a closer comparison of dental and physical characteristics will be necessary before individual identifications can be confirmed. Forms 371 for each of the individuals concerned are inclosed.

X-293 Wake P.I. X-513-515 (Manila #2)

Ltr 28 February 1949

SUBJECT: Identification of Deceased Personnel

3. It is requested that the remains of Unknown X-4232, recommended for identification as Private Elmer Daniels, be reprocessed to determine if teeth L-2 and L-6 were missing before or after death.

4. Additional dental information has been received for Staff Sergeant John J. Accomando, which indicates that he may be associated with Unknown X-4233. A closer dental and height comparison exists between this soldier and the remains of Unknown X-4233, than for the remains of X-4236, recommended for individual identification as this soldier.

5. Dental information for Pfc Norman W. Finton does not compare favorable with the dental data for the Remains of Unknown X-4237, recommended for identification as this soldier.

6. The comparison of dental data for Unknown X-4238 and Private Donald H. Surber, recommended for individual identification, is not conclusive. This soldier was reported to be buried in Grave 828, and remains were recovered from Grave 825. (See paragraph 2, above). The same situation exists in the case of remains of Unknown X-4239 and Sergeant Charles A. Coggeshall for whom no conclusive dental comparisons are noted.

7. It is requested that remains recovered from Graves 825 and 829, Cabanatuan POW Cemetery, which were recommended for identification be reprocessed in the Central Identification Laboratory, and that finding be reported to the Field Board of Review for their action.

8. It is further requested that this Office be advised at the earliest practicable date.

FOR THE QUARTERMASTER GENERAL:

16 Incls:

G. H. MEYER
Lt. Colonel, QMC
Memorial Division

INSTRUCTIONS FOR PROPER MARKINGS ON DENTAL CHART

1. Give all information and description on dental chart as nearly correct as the condition of the body will allow. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: lost teeth, crowned teeth, bridgework, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.
