This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

SUBJECT: Exhumation Order #715

TO : Commanding General, A.G.R.C.
APO 58, US Army
ATTENTION: Registration Division

1. Per telephonic instructions received from Miss Black, Registration Division and letter to your Headquarters, extra teeth interred with Kornblau, Plot IIII, Row 1, Grave 7, USMC, St Avold, France, were removed therefrom, assigned a new X-number and placed in storage at USMC, St Avold pending further disposition.

2. Inclosed tooth chart and corrected Reports of Burial are for your information and file.

3. Due to the necessity for immediate action, and difficulty in telephonic transmission, Reports of Burial are uncomplete in so far as time, date and place of death are concerned.
