Mr. Alton E. Burnett 655 Union Street North Adams, Massachusetts

Dear Mr. Burnett:

This Office is conducting an investigation in an attempt to identify an Unknown Deceased member of the Armed Forces who was killed in the vicinity of Reipertsweiller, Germany, during the winter of 1944-1945.

A scratch pad with the following name and address was found on the remains:

PFC Alton Burnett Det of Patients, #4181, Hosp Plt APO #121, o/o PM, NYC

It would be of utmost value to this Office if you could furnish replies to the following questions:

- a. Was the above your address at any time during the winter of 1944-1945?
- b. To what organization were you assigned during that time?

c. Could you furnish the name and serial number or organisation of anyone who might have had your name and address as listed above?

replyings please use the inclosed self-addressed envelope not postage, in order to expedite delivery.

Sincerely yours,

THOMAS E. COX QMC Capt Memorial Division

CASE HISTORY

UNKNOWN No. X-535

U.S. MILITARY CEMETERY St Avold. France

The remains now designated Unknown X=535 (USMC St Avold) were recovered from the forest in the vicinity of Reipertswiller, France. Tooth chart obtained for X=535 has been compared with dental data available for casualties reported in this area with negative results. Leundry markings "C=5156", "M=7143", "G=5156", "B=5953" and "B" or "R=5187" could not be associated with any casualty reported missing in France. An attempt was made to associate these remains with a casualty by using the address found with remains but this proved negative. In view of the aforementioned factors these remains are being declared UNIDENTIFIABLE.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

ET FORM 1-22 (29 AUG:46)

- (OLD GRAVE REGISTRATION FORM 1-A)

| MESSING TEETH . All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be "X" 'd out and labeled, thus: |                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| CROWNED TEETH Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus:                                              | Gold crown-y Percelaincrown  |
| BRIDGE WORK Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus:                                                       | Gold bridge                  |
| FILLINGS. Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus:                                                | Gold filling, Silver filling |
| CARIES (CAVITIES). Outline location and size of cavity, shade in thus:                                                                                    | 866000                       |

DENTURES (PLATES)... Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp"

#### ADDITIONAL SPACE FOR FURTHER REMARKS

Posthumously missing R 1,9,12,13; L 1, 2.

Mesial rotation 1/8 turn

Medium sized teeth in very good alignment. Have started to turn pink.

There has been much dental work and it is well done on this set of teeth.

All silver fillings
This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
