This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

NARRATIVE

Exhumation Order 3385

17 October 1950

The following remains X-6202, St. Avold, AB-8-85 has been reprocessed and the results shown below:

	<u>AGE</u>	<u>HEIGHT</u>	<u>WEIGHT</u>	<u>HAIR</u>	<u>RACE</u>
X-6202 (no 371)	21-22	5' 5 3/8"	aprx 165	Brown	White

Mandible articulates with skull, however, skull does not articulate with vertebral column due to missing cervical vertebrae. The remains is homogeneous. Structure of bones indicate that remains was of very heavy build. Shoe size is estimated to be 11 D or E.

Measurement of long bones indicate that remains was right handed.

It is also believed that remains is white, this opinion is based on measurements of long bones.

CAUSE OF DEATH: Due to fractured skull and frontal parts that are missing it is believed that death occurred by skull injury. The skeletal structure is intact.

CASE HISTORY

UNKNOWN NO.

X-6202

U.S. MILITARY CEMETERY

St Avold, France

(Location)

Unknown X-6202 was recovered from an isolated grave near Baerenthal, (Moselle) France. There were nineteen others recovered at the same time most of whom have been identified. An attempt has been made to associate this unknown with casualties of the same organizations as the identified remains. This attempt has been unsuccessful.

The estimated date of death is determined as January 1945. Clothing with the remains indicates ground forces. Cause of death is undetermined.

As all attempts to identify this unknown have been unsuccessful, this remains is hereby declared UNIDENTIFIABLE.

Partial identification as James C. STOWE, as referred to on the Area Search is erroneous as the subject decedent ~~is permanently interred in USMC, St Avold~~ *has been repatriated*
