U.S. MILITARY CEMETERY \_ Saint Avoid

The remains of Waknown X-S49 (WSMS Saint Avold) were recovered from the civilian cometery located at Corsheig, Cormany. All attempts to associate Laundry marking "M-\$502" with an unresolved ground force easualty met with failure. An attumpt was also made to determine to which organization "John J. KIRTON, 0-377388" was assigned without results. Tooth chart and physical characteristics of X-549 were compared against like information on Form 371's for unresolved easualties reported missing in the area of Gersheim without results. In view of this these remains are being declared UNIDENTIFIARE.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
