ANTHROPOLOGICAL REPORT (continued)

2. CONCLUSIONS

- a. The remains of the following deceased ~~Standard~~ *have been* individually ~~identified~~ *associated* as indicated:
- | | | |
|-------------------|---------------------|------|
| (1) A-13306 | Standard | (6) |
| (2) X-7851 | Standard | (7) |
| (3) <i>Orange</i> | Standard | (8) |
| (4) <i>X-7887</i> | Standard | (9) |
| (5) <i>X-7887</i> | Standard | (10) |
- b. The remains of the following deceased should be considered a Group Burial:
- | | |
|-----|------|
| (1) | (6) |
| (2) | (7) |
| (3) | (8) |
| (4) | (9) |
| (5) | (10) |

3. ADDITIONAL REMARKS

3
RESUMÉ

The following associations have been made after processing the remains listed on page 273.

	<u>age</u>	<u>height</u>	<u>weight</u>	<u>Hair</u>
CLAEYS (remains)	23-27	5'11 5/8"	160 lbs.	None found
CLAEYS (371)	24	5'6 1/2"	126	Brown

The teeth found in these remains are those of CLAEYS and articulation between teeth and skull established. No articulation between the skull and the vertebral column is possible because of missing parts. The remains except the teeth and the skull are more favorable for H. R. Marshall. The height and weight of these remains are not favorable for CLAEYS.

A-7851 (remains)	22-27	5'9"	154	None
VANA (371)	25	5'9"	154	Brown

No teeth recovered for VANA and this association is based solely on estimated age, height and by comparing with weight.

A-7857 (remains)	25-27	5'11 1/8"	149	None found
RYAN (371)	25	5'10"	149	Brown

The teeth for RYAN were found with these remains and articulation between the skull and teeth was established. No articulation between the skull and vertebral column is possible because of missing portions.

A-13026 (remains)	22-27	5'6 1/8"		None found
-------------------	-------	----------	--	------------

Teeth missing. Skeletal parts are insufficient to establish any definite association with the Form 371 submitted. However, on the basis of estimated age and height, the subject skeletal parts can be associated with the skull and teeth found in the remains of CLAEYS and which, as I have shown already (see my remarks on the remains CLAEYS), are not in agreement with that remains. The skeletal materials found in the remains A-13026 along with the skull and teeth recovered with the remains CLAEYS may form a separate remains although there is no articulation (due to absence of articulating anatomical parts) to substantiate my statement.

NARRATIVE

The following associations have been made after reprocessing the remains listed on M.O. # 3273.

	<u>Age</u>	<u>Height</u>	<u>Weight</u>	<u>Hair</u>
CLAEYS (Remains)	23-27	5'11 5/8"	Not Fav.	None found
CLAEYS (371)	24	5'6 1/2"	126	Brown

The teeth found in these remains are those of **CLAEYS** and articulation between teeth and skull established. No articulation between the skull and the vertebral column is possible because of missing parts. The remains except the teeth and the skull are more favorable for **BONHAR, Marshall**. The height and weight of these remains are not favorable for **CLAEYS**.

I-7851 (Remains)	22-27	5'9"	Fav.	None
VANA (371)	23	5'9"	154	Brown

No teeth recovered for **VANA** and this association is based solely on estimated age, height and by comparing with weight.

X-7887 (Remains)	23-27	5'11 1/8"	Fav.	None found
PYNUM (371)	25	5'10"	149	Brown

The teeth for **PYNUM** were found with these remains and articulation between the skull and teeth was established. No articulation between the skull and vertebral column is possible because of missing portions.

I-13026 (Remains)	22-27	5'6 1/8"		None found
--------------------------	-------	----------	--	------------

Teeth missing. Skeletal parts are ^{too} insufficient to establish any definite association with the Form # 371 submitted. However, on the basis of estimated age and height, the subject skeletal parts can be associated with the skull and teeth found in the remains of **CLAEYS** and which, as I have shown already (see my remarks on the remains **CLAEYS**), are not in agreement with that remains. The skeletal materials found in the remains **I-13026** along with the skull and teeth recovered with the remains **CLAEYS** may form a separate remains although there is no articulation (due to absence of articulating anatomical parts) to substantiate my statement.
