SUBJECT: Identification of World War II Deceased

TO: Commanding General
Philippine Air Command
P. 74, c/o Postmaster
San Francisco, California
ATTN: AGS, PHILIPPINE

1. Reference is made to Proceedings of your Board of Review, dated 25 August 1949, recommending group identification of Unknowns X-4135 through X-4138, AGS Mausoleum, Manila, P.I., as the remains of:

BERGHE, Louis F.	Sgt	6 832 240
LAMBE, Charles S.	Pfc	6 384 960
MILSON, Arvid K.	Pfc	19 054 295
MERRIN, Joseph C.	Pvt	14 042 476

2. After an extensive study of this case, it is considered that the evidence presented cannot be interpreted as sufficient for a group identification.

3. The association of these four decedents with the remains recovered from the communal grave, Cabanatuan PW Cemetery, is based upon information contained in the Cabanatuan PW Death Report. Experience with this report has proved it to be a valuable aid for the association of decedents with unknown remains. However, in repeated instances, it has been shown that the report does not constitute substantive proof within itself. Therefore, it is subject to qualifying or substantiating comparison of dental and physical data.

4. Dental records for the decedents involved in this case are meager and are probably incomplete. They represent a marked similarity which would probably compare equally well with any cross-section of remains recovered from Cabanatuan Cemetery.

5. Since there is no adequate substantiating evidence available in this case, Board Proceedings have been disapproved and are returned

INSTRUCTIONS FOR PROPER MARKINGS ON DENTAL CHART

1. Give all information and description on dental chart as nearly correct as the condition of the body will allow. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (grinding teeth). An examination should be made and findings charted to cover the following basic conditions: lost teeth, crowned teeth, bridged teeth, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.
