HEADQUARTERS, AMERICAN GRAVES REGISTRATION COMMAND, THEATER SERVICE FORCES,
EUROPEAN THEATER, APO 887, U. S. ARMY. 23 January 1946.

TO: The Quartermaster General, Washington 25, D.C.

1. In reply to basic communication, your letter dated 6 September 1945, was forwarded to the 7th Armored Division requesting any information available concerning subject tank. Since we have received no reply to this correspondence and the unit is no longer in this theater it is suggested that the unit concerned be contacted by your headquarters.

2. It is noted on the Report of Burial that the tank was numbered #3082237 7-17 C-8, which seems to indicate that the tank was operated by the 17th Armored Infantry Regiment of the 7th Armored Division and the C-8 indicates that it belonged to car eight.

3. Should any further information become available to this headquarters it will be forwarded to you at the earliest practicable date.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspid (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
