APO 58, c/o Postmaster
New York, New York

1. Attached information relative to circumstances surrounding death of T/4 Joseph F. Serafin, 36036178 is forwarded in accordance with request contained in radio AGRC 5825.

2. Investigation in this Office reveals a possible association between X-10, USMC Solers, France and T/4 Serafin.

3. It is noted that the seven (7) casualties listed for Reconnaissance Company, 32nd Armored Regiment on 3 September 1944 (see attached copy After Action Report, 32nd A.R.) were interred at Solers. Burial information contained on Reports of Interment for those seven men is quite similar to that contained on Reports of Interment for Unknowns X-6, Z-9, X-10 and X-14, USMC Solers. Unknowns X-6 and X-9 may be eliminated inasmuch as the fingerprints do not compare favorably. X-14 was recovered from a tank, and this is not in agreement with the known facts surrounding T/4 Serafin's death. Original Report of Interment for Unknown X-10 indicates T/4 stripes and 3rd Armored Division Patch, which are in agreement with T/4 Serafin's rank and organization.

4. It is requested that an investigation be conducted, and if the evidence warrants, that the facts be presented to a Field Board of Review and the findings forwarded this Office by Air Mail.

5. A Congressional inquiry has been received for T/4 Serafin.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
