CASE HISTORY

Unknown X-9072

AGRS Mausoleum-Liege

Unknown X-9072 was recovered during search for the remains of S/Sgt George H. Leventon, 39 412 772, reported KIA in an aircraft crash near Hollerath, Germany.

The remains were actually recovered in adjacent Belgian territory, and consist of a skull only with several maxillary teeth intact.

Tooth chart for X-9072 is contradictory to dental data for S/Sgt Leventon. Tooth chart was also checked with negative results against Forms 371 for all casualties, resolved and unresolved, reported KIA in the area covered by map sheets Germany 3, and Belgium.

The case papers on all remains, resolved and unresolved, recovered from the vicinity of Hollerath, Germany and adjacent Belgian territory were checked with negative results for possible association with Unknown X-9072.

No record can be found of an A/C which crashed at the point of recovery.

In view of the above circumstances, it is believed that Unknown X-9072 should be considered Unidentifiable.

S. O. PUSEY

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

PROCESSING NARRATIVE

- 1. Search and Recovery Case #276 consists of a skull only with several maxillary teeth still intact.
 - 2. Estimated Age is 26 to 28 years based on closure of skull sutures.
- 3. The dental repair is similar to U. S. dentistry but of the seven (7) complete teeth which are present, three of them have large cavities. The presence of these large cavities is strong evidence that this skull is for a non-American deceased. It is especially contradictory for U. S. Air Force personnel.
