NARRA TIVE

The following remains were processed simultaneously:

Common Grave 15, (Unknown X-90 and X-91) Guadalcanal, Plot-C,

Row-85, Grave-7.

Upon examination it was found that the partial remains of at least four (4) individuals (duplication of left calcaneus and left medial femoral condyle) were present.

Unknown X-90, which was a fairly complete remains shows evidence which indicates the white race.

In two of the remains, Unknown X-91 "A" and X-91 "B", certain criteria are indicative of the Mongoloid race (i.e. shortness of stature, platymeria, squatting facets, bowed femora and retroverted tibial heads).

The remaining skeletal parts (calcaneus and medial condyle of left femur) were catalogued and filed as C. I. L. Unknown X-871.

The three remains were wrapped separately and placed in the original casket.
