This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

(LATES). Draw diagram of relative size and shape of plate, block in teeth indicate remaining clasps on natural teeth with the word "clasp."

ADDITIONAL SPACE FOR FURTHER REMARKS

- ⊗ = Posthumously missing.
- ⊘ = Teeth chipped or broken

Spaces: R-4-6, 5mm.

R-6 - has rotated 1/8 of a turn mesially.

Color : dull ivory with some teeth being bleached white

Size : average

Alignment: good as far as it is able to determine with only 4 teeth.
