CASE HISTORY

Unknown X-9118

Griesheim/Main Mausoleum

The remains designated Unknown X-9118 were recovered from the surface of the ground in the forest district # 36, Hurtgen Forest,(3/F) Germany. Large quantities of U.S. military clothing and equipment recovered with this remains indicates the casualty was American.

Identification media including estimated age, estimated height, estimated weight-plus the facts that decedent was killed as the result of artillery action and was of the Catholic faith has been compared with records of unrecovered casualties lost in the area from which this recovery has been made. No definite association could be made due to the great number of favorable comparisons that are possible.

In view of the fact there is insufficient identification media present to enable individual identification, it is therefore recommended that this remains be declared unidentifiable.

REPORT OF INVESTIGATION

While on an investigation at BOECK, Germany the undersigned investigator was informed by a Mr. BURGHARDT, forester of BERGSTEIN, (Huertgenforest) that the remains of an American soldier had been found by his woodcutters.

On 12 May 1952 the undersigned and forester BURGHARDT proceeded to the place of finding located in district # 36 of the Huertgenforest. Remains, believed to be those of an American soldier on basis of fragments of US Army clothing and other US equipment present with and about the remains, were found on the surface of the ground grown over with grass and small roots.

Remains consisted of the greater portion of the body but only pieces of the skull were found. No identification tags or other means of identification could be found on or about the remains.

The remains were assigned SR # 352 and shipped to Frankfurt CIL for processing and possible identification.

HEINZ CHMITZ
Interpreter-Investigator

INVESTIGATION DIRECTIVE : Non

SR # 352

PROCESSING DIRECTIVE

164

19 May 1952

NARRATIVE OF PROCESSING

1. Search and Recovery Case # 352 pertains to one (1) deceased recovered forest district # 36, HURTGEN FOREST (Germany 3) near BERGSTEIN. Remains were on the surface of the ground but grown over with vegetation. A large amount of U.S. Army clothing was found amongst the remains which indicated that the deceased was an American casualty. There were no identification tags recovered or any markings found on the clothing.

2. This case is now designated as follows:

SR # 352 now designated UNKNOWN X-9118 Griesheim/Main Mausoleum Grave 119

3. Laboratory examination disclosed the following identification media:

X-9118 (Remains) Aprx 33 Yrs 5'-95/8" None found 155-175 Lbs

There were no teeth recovered with this remains. A catholic religious medal was found and a description has been placed on the Form 1044. The medal has been left with the remains. Ground Force (US) clothing found with this case included the following items: Wool OD sweater; wool OD trousers; leggins; M-41 Field Jacket and an unofficial "Ike Jacket" made from a blouse.

4. CAUSE OF DEATH: The skull and lower left leg show evidence of being severely shattered. The presence of small shrapnel portion in the left talus plus the finding of two larger pieces of heavy artillery shrapnel with the remains indicates that death was caused by shrapnel woulds.
