CASE HISTORY

UNKNOWN X-9131

Griesheim/Main Mausoleum

The remains designated Unknown X-9131 represent one (1) of three (3) deceased recovered from a destroyed bunker located 2 kilometers SSW of GERMETER in Forest District # 20 "Raffelsbrand", (3/F-012303) Germany.

The finding of considerable U. S. Military clothing and equipment is the only indication that these are the remains of an American casualty.

A study made of the records of casualties lost in the areas surrounding the recovery site indicates a large number of possible associations but due to the small amount of skeletal portions recovered and the consequent lack of sufficient identification media it is not possible to make any definite individual or group association between these remains and known American casualties lost in this area of large scale fighting.

In view of the above noted circumstances, it is recommended that the remains designated Unknown X-9131 be declared "Unidentifiable".

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

Size - Average

Color - I vory

Posthumously

Missing - Rq, 10, 11, 12, 13;

- Lq, 10, 11, 12, 13.

Signature of Officer or other person who prepared Toogh chart

L14 occlusal surface severely pitted.

L14 occlusal surface pitted with 3 super - Verfield by G. R.C. Officer

Wear - Very light.

ET FORM 1-28 (29 KUG. 46)

MISSING TEETH All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be "X" 'd out and labeled, thus:	
CROWNED TEETH Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus:	Gold crown - Porcelaincrown
BRIDGE WORK Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus:	Gold bridge
FILLINGS Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus:	
CARIES (CAVITIES). Outline location and size of cavity, shade in thus:	Cavity Decayed O O O O

DENTURES (PLATES)... Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp"

ADDITIONAL SPACE FOR FURTHER REMARKS

INVESTIGATION DIRECTIVE: 973

SR # 358 A, B & C

PROCESSING DIRECTIVE

171

10 July 1952

NARRATIVE OF PROCESSING

- l. Search and Recovery Cases # 358 A, B and C pertain to partial remains of three (3) deceased recovered from a bunker located two kilometers SSW of GERMETER, in forest district # 20 "Raffelsbrand", (3/F-012303) Germany. The finding of a considerable amount of U.S. clothing and equipment is a good indication that the recovered portions represent partial remains of American casualties. It was also noted that the finding of two badly damaged US helmet liners coincided with the finding of skull fragments for two (2) deceased.
- 2. No association could be made with known US casualties because of the small amount of skeletal portions recovered. Segregation was accomplished according to size, weight, structure and age of portions recovered. Designation of Unknown "X" numbers has been made as follows:

SR # 358-A now designated UNKNOWN X-9131 Griesheim/Main Mausoleum Grave 132

SR # 358-B now designated UNKNOWN X-9132 Griesheim/Main Mausoleum Grave 133

SR # 358-C now designated UNKNOWN X-9133 Griesheim/Main Mausoleum Grave 134

3. Individual physical characteristics are as shown below:

ACE HEIGHT WEIGHT HAIR

X-9131 (Remains) 25 - 35 yrs. At least 6'0" Very Hvy None found

Mandible does not articulate with skull portions but has been placed with this case because of the favorable comparison in size.

X-9132 (Remains) 20 or over 5' - 10" Med. Wt. None found

X-9133 (Remains) 17-18 Yrs 5' - 53/8" Lt. Wt. None found

4. CAUSE OF DEATH: Severely shattered condition of skeletal remains indicates death was probably caused by explosion.

HEADQUARTERS 7770TH EUCOM QM MORTUARY SERVICE DETACHMENT APO 757 US ARMY

27 June 1952

NARRATIVE OF DISINTERMENT

In accordance with ID # 973, Case # Misc., dated 13 June 1952, an investigation was conducted in COLOGNE and the Hurtgen Forest area in order to recover a remains believed to be those of a US World War II deceased.

In a letter dated 19 May 1952, Dr. LUDWIG FINKE, procurist of a textile firm in COLOGNE (K-51/F-95), Muchlengasse 1-15, informed this office that upon an excursion to the Hurtgen Forest he had found human remains, clothing fragments, and an American helmet near a bunker. Concluding the presence of an American deceased, Dr. FINKE collected the remains as best he could at the time and took them to his residence in COLOGNE for safekeeping pending further disposition by American authorities.

Upon contacting Dr. FINKE in COLOGNE, the remains recovered by him, and consisting of several shattered arm, leg bones, several vertebrae and ribs, pieces of skull and hip amd a part of mandible were submitted to this investigator. Questioning Dr. FINKE, it was learned that he had recovered the remains together with helmet liner and clothing fragments at a bunker located 2 kilometers SSW of the town of GERMETER in the forest district # 20 "Raffelsbrand" on 1 June 1952. (See attached sketch). No ID tags or other means of identification had been found at or near the site of finding.

Arriving at the subject bunker, which had been blasted after the war, the area was thoroughly searched. The huge masses of destroyed bunker prohibited the thorough search of all crevices, however, the site where the remains had originally been found and which appeared to have been r cently disturbed was excavated to hard soil at 70 cm. In an area of 3 x 5 meters additional human remains, consisting of vertebrae, ribs, leg bones, pieces of skull and various fragments of German and American equipment were found intermingled. No means of identification could be found.

The remains have been assigned SR # 358 and submitted to the CIL Morgue, Frankfurt/Main for further processing and possible identification.
