INSTRUCTIONS FOR PROPER MARKINGS ON DENTAL CHART

1. Give all information and description on dental chart as nearly correct as the condition of the body will allow. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (grinding teeth). An examination should be made and findings charted to cover the following basic conditions: lost teeth, crowned teeth, bridges, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found.

As requested, the above eight (8) remains were examined by me for fractures of wrists, and noses, and amputations of toes.

The facial portions of the crania of all but USK L-675 are missing precluding an examination for broken noses. The portions of the nasal bones present of USK L-675 do not indicate that they have been broken.

The wrist and toe bones of the eight (8) remains are largely missing, or so eroded, that no accurate determination of fractures of the wrists or amputation of the toes was possible.

21. REMARKS AND ADDITIONAL INFORMATION

This is the remains of a male individual, of white ancestry, tall (est. 5' 11½") and muscular, and in the early or mid thirty's (possibly older). Few strands of light brown hair found clinging to cranium, and an old fracture on lower one-third (near extremity) of left fibula.

To the best of my ability, this remains is properly segregated, and represents one and the same individual.

The above eight (8) remains were examined simultaneously by me this date for proper segregation, and new MC Form 1044 were accomplished for each remains. As requested, careful examination was made for "fractures of wrist, nose and amputation of toes"; however, bones necessary for establishing the above were missing, or partly missing, in all of the remains.

In so far as the condition of the remains allows for proper association, and to the best of my ability, each of the above remains is now properly segregated. Bones improperly associated were assigned CIL #522.
