STATEMENT

Reference: USK 1-4237 Male (formerly 1-513, Manila #2)
 " 1-4238 " (" 1-514 " "
 " 1-4239 " (" 1-515 " "
 " 1-4232 " (" 1-474 " "
 " 1-4233 " (" 1-475 " "
 " 1-4234-A " (" 1-476 " "
 " 1-4234-B " (" 1-476 " "
 " 1-4235 " (" 1-477 " "
 " 1-4236 " (" 1-478 " ")

The above nine (9) remains from Graves 825 and 829 Cabanatuan
 PDI Cemetery were reprocessed by me this date for proper segregation,
 and new 100 Form 1044 were accomplished for each.

Each of the remains is now properly segregated, and each repre-
 sents one and the same individual. Improperly segregated bones,
 which could not be reassociated due to their eroded condition, were
 assigned CI 1589.

Examination of the three (3) remains from Grave 825 yielded the
 following associations:

USK 1-4237 Male, compares very favorably with LeCHUY, Douglas P.,
 as to height and absence of extractions. LeCHUY's age is not known
 at this headquarters but the estimate age of the remains is 22 to 26
 years.

USK 1-4238 Male, compares very favorably with BURMAN, Donald H.,
 as to short height (BURMAN was the shortest decedent involved, and
 this remains is the shortest of the group), hair color, and absence
 of extractions and fillings. The third molars marked "2" on BURMAN's
 dental chart were possibly unerupted at time that the dental chart
 was made. BURMAN's age is not known at this headquarters, but the
 estimate age of the remains is 22 to 27 years.

USK 1-4239 Male, compares very favorably with COOPERHALL, Charles
 A., as to height, race, and absence of extractions and fillings (there
 was only one (1) small filling on R-14 on this remains). COOPERHALL's
 age is not known at this headquarters, but the estimate age of the
 remains is 20 to 25 years.

 " L-4243 " (" L-476 " " ")
 " L-4244 " (" L-477 " " ")
 " L-4245 " (" L-478 " " ")

The above nine (9) remains from Graves 825 and 829 Cabanatuan POW Cemetery were represented by me this date for proper segregation, and new GIC Form 1044 were accomplished for each.

Each of the remains is now properly segregated, and each represents one and the same individual. Improperly segregated bones, which could not be reassociated due to their eroded condition, were assigned GIC 1589.

Examination of the three (3) remains from Grave #825 yielded the following associations:

USM L-4237 Male, compares very favorably with LeBOY, Douglas E., as to height and absence of extractions. LeBOY's age is not known at this headquarters but the estimate age of the remains is 22 to 26 years.

USM L-4238 Male, compares very favorably with SURBER, Donald H., as to short height (SURBER was the shortest decedent involved, and this remains is the shortest of the group), hair color, and absence of extractions and fillings. The third molars marked "X" on SURBER's dental chart were possibly unerupted at time that the dental chart was made. SURBER's age is not known at this headquarters, but the estimate age of the remains is 22 to 27 years.

USM L-4239 Male, compares very favorably with GOODENHALL, Charles A., as to height, race, and absence of extractions and fillings (there was only one (1) small filling on R-14 on this remains). GOODENHALL's age is not known at this headquarters, but the estimate age of the remains is 20 to 25 years.

Incl # 30, Two pages

(Cont'd)

- x -

Examination of the six (6) remains from Grave #829 yielded the following results:

UNK I-4232 Male, compares perfectly with DANIELS, Elmer as to great height, and pattern of extractions.

UNK I-4233 Male, compares very favorably with ACCIARDO, John J., as to height and dental work. The presence of a porcelain (Davia) crown on I-1 is a very diagnostic, and favorable comparison.

UNK I-4236 Male, compares very favorably with GOUDLAY, Carlton R., as to height and pattern of extractions and fillings.

The other three (3) remains from Grave #829 do not compare favorably enough for individual comparison with the other associated decedents.

I recommend the individual identification of the following unknown remains:

UNK I-4237 Male as LECHRY, Douglas W.
UNK I-4238 Male as SWANER, Donald H.
UNK I-4239 Male as COOPERHALL, Charles A.
UNK I-4232 Male as DANIELS, Elmer
UNK I-4233 Male as ACCIARDO, John J.
UNK I-4236 Male as GOUDLAY, Carlton R.

29 February 1949

SUBJECT: Identification of Deceased Personnel

TO : Commanding General
Philippine Command
APO 707, c/o PM, San Francisco, Calif
ATTN AGRS PHILCOM ZONE

1. Reference is made to Board Proceedings, your Headquarters, recommending the following identification:

Unknown X-4232 as Daniels, Elmer, Pvt. 15 017 359

Unknown X-4236 as Accomando, John J., S/Sgt. 6 981 597

Unknown X-4237 as Finton, Norman W. Pfc. 6 578 716

Unknown X-4238 as Surber, Donald H., Pvt. 19 018 756

Unknown X-4329 as Coggeshall, Charles A., S₁t., 19 018 755

and the Group Identification of Unknowns X-4233, X-4234-Z, X-4234-B, and X-4235 as the recoverable remains of:

Anderson, John A.	T/Sgt.	7 031 364
Gourlay, Carlton R.	Pvt.	32 074 027
Jordan, Major B.	Cpl.	6 923 348
LeCroy, Douglas W.	S/ Sgt.	6 971 422
Olson, Everell D.	S/Sgt.	6 913 132

These Board Proceedings are being returned herewith.

2. Since a discrepancy exists between the grave numbers shown for these individuals on the Cabanatuan Death Report and the actual grave from which several of the remains being recommended for identification were recovered, a closer comparison of dental and physical characteristics will be necessary before individual identifications can be confirmed. Forms 371 for each of the individuals concerned are inclosed.

X-293 Unk P.I. #2
X-4235-
(Mausolona #2)

Ltr 28 February 1949

SUBJECT: Identification of Deceased Personnel

3. It is requested that the remains of Unknown X-4232, recommended for identification as Private Elmer Daniels, be reprocessed to determine if teeth I-2 and I-6 were missing before or after death.

4. Additional dental information has been received for Staff Sergeant John J. Accomando, which indicates that he may be associated with Unknown X-4233. A closer dental and height comparison exists between this soldier and the remains of Unknown X-4233, than for the remains of X-4236, recommended for individual identification as this soldier.

5. Dental information for Pfcg Norman W. Finton does not compare favorable with the dental data for the Remains of Unknown X-4237, recommended for identification as this soldier.

6. The comparison of dental data for Unknown X-4238 and Private Donald H. Surber, recommended for individual identification, is not conclusive. This soldier was reported to be buried in Grave 828, and remains were recovered from Grave 825. (See paragraph 2, above). The same situation exists in the case of remains of Unknown X-4239 and Sergeant Charles A. Coggeshall for whom no conclusive dental comparisons are noted.

7. It is requested that remains recovered from Graves 825 and 829, Cabanatuan POW Cemetery, which were recommended for identification be reprocessed in the Central Identification Laboratory, and that finding be reported to the Field Board of Review for their action.

8. It is further requested that this Office be advised at the earliest practicable date.

FOR THE QUARTERMASTER GENERAL:

RESTRICTED

Section 3.—UNIDENTIFIED REMAINS.

INSTRUCTIONS:

(a) Great care will be taken to record the most minute clues for the future identity of unidentified remains. Fill in anatomical characteristics below, and any other clues under "Other," such as shoe size, social security number; position of body found in airplanes, vehicles, and tanks; and serial numbers of airplanes, vehicles, and tanks.

(b) A fingerprint, or prints, are the most valuable of all clues. Imprint all fingers and thumbs in the chart at left, or as many as possible. If no fingerprint or prints can be secured, the condition of each and every tooth will be indicated on the tooth chart in accordance with diagram below. Tooth chart will not be accomplished if one or more fingerprints are secured.
