(Location)

The remains of Unknown X-1088 (USMG Saint Avold) was recovered from either Mulhouse or Unrwiller, France. Laundry marking "9388" found on clothing of X-1088 was checked and found to agree with last four digits of ASN for a Pfc Adams. And although Pfc Adams was missing in the area these remains are definitely not those of Pfc Adams as tooth chart and physical characteristics of X-1088 are contradictory to those of Pfc Adams. As Pfc Adams was a member of the 157th Infantry Regiment it was thought that possibly this case could be that of a unresolved casualty of that organization. All Form 371's for casualties of that organization were compared with data for X-1088 without favorable results. Furthermore as all Form 371's for unresolved casualties on Map Sheet K-19 were compared against X-1088 without an association being made, these remains are being declared U N I D E N T I F I A B L E.

GRAVES REGISTRATION FORM Nº 1-A

MISSING TEETH All teeth missing through previous extraction (not those fractured or displaced by recent wounds) should be "X"'d out and labeled, thus:	MANAMA
CROWNED TEETH Block in solid the crown of tooth (label gold, porcelain, Silver or gold and porcelain), thus:	
BRIDGE WORK Block in solid the crown of tooth (label gold bridge, gold and porcelain bridge), thus:	Gold bridge
FILLINGS. Draw filling on tooth as accurately as possible (block in and label gold, silver, cement), thus:	
CARIES (CAVITIES) Outline location and size of cavity, shade in thus;	Cavity Decayed 5

DENTURES (PLATES)... Draw diagram of relative size and shape of plate, block in teeth attached and indicate retaining clasps on natural teeth with the word "clasp."

ADDITIONAL SPACE FOR FURTHER REMARKS

- Posthumously missing

R-16 has a carie on the occludial surface which had a filling but has become lost

Spaces: R-13-15 - No space L-13 (Pit) -15 - 6 mm R-11-12- 3mm

R 12 & 13 have rotated 1/8 of a turn mesially The pit of L-13 suggests that it had rotated 1/16 of a turn mesially .

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.

20 February 1946

SUBJECT: Identification of Unknowns

TO : Commanding General, AGRC, APO 887, U.S. Army.

- 1. Because of the unusual circumstances involved in the recovery of the remains of UNK-X-1087, 1088, 1089 and 1091 it is felt at this office that a letter of explanation is necessary to clarify the reports of interrment of these remains.
- 2. The remains were brought to St. Afold Cemetery by a French mine clearing unit in burlap sacks unlobeled as to the location from which they came.
- 3. An investigation team was sent out by this office which determined by consultation with the minesclearing unit where the four remains were found but it was impossible to find out which remain came from which locations. The GR # 1 forms therefore list two possible places from which the remains were removed.

ROBERT D. HEILMAN lst Lt., Inf. Commanding.

Toron are in outsail, orly app. I'm distance, so even if exact locations. for each, would have been given for all, course is same for all,
