The Federal Bureau of Investigation reports that the fingerprints for Unknown X-6379, St. Avold, contained on the Fingerprint Card attached to the burial report do not contain sufficient ridge detail for identification purposes. A notation on the reverse side of the burial report indicates that photographs may have been taken of the fingers. If this is true and the photographs are available, it is possible that they may show up more ridge details than the fingerprints. If such photographs are submitted, a further check will be made.
