Attention is directed to information contained in basic letter concerning an unidentified deceased soldier whose remains were recovered in a place where the 20th Armored Div was reported to have been operating. It is desired that a check be made to determine if the deceased soldier can be identified as .

a former member of your command on the basis of the clothing marking or the initials "BB".

2. If these clues do not furnish a lead to the deceased's identity, a list should be prepared of the names of all former members of your command who are still carried as MIA in the vicinity of Neuherberg, Germany, and of those who are carried as deceased but for whom a report of burial has not been received. The clothing sizes and physical characteristics of these men should then be compared with those listed for the deceased soldier in the basic letter. If any outstanding dissimilarities are discovered, those names should be deleted from the list. Height, weight, color of hair, clothing sizes and copies of Missing in Action Reports should be forwarded for men who might be identified as the deceased soldier described in the basic letter.

This dental chart is very important and should be filled in with great care. There are 32 teeth to be accounted for, as shown by the numbers on the chart. Beginning at the middle line in both upper and lower jaws, the teeth are arranged symmetrically on either side and classed as incisors (cutting teeth), cuspids or canines (tearing teeth), bicuspids (chewing teeth), and molars (principal chewing teeth). An examination should be made and findings charted to cover the following basic conditions: Lost teeth, crowned teeth, bridge work, fillings, caries (cavities of decay), dentures (plates), and any deformity of jaws found. See reverse side for illustrations.
